AVAT12006 Commercial Pilot Licence Aerodynamics & Aircraft General Knowledge Term 1 - 2026

Profile information current as at 22/01/2025 08:35 pm

All details in this unit profile for AVAT12006 have been officially approved by CQUiversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit will provide you with the knowledge of aerodynamics relevant for low altitude, sub-sonic flight in piston engine aircraft and the knowledge of small commercial aircraft power plants and systems. You will cover the aeronautical knowledge requirements of the Civil Aviation Safety Authority Commercial Pilot Licence aerodynamics as well as the General Aeronautical Knowledge syllabus. You will study the aerodynamic properties of an aerofoil and how it produces lift and drag. You will also study the forces and moments acting on an aeroplane in flight and how these affect an aeroplane's stability and controllability. Normal and abnormal flight characteristics and performance will also be studied. Topics you will study in depth include piston engine power plants and propellers. You will learn about aircraft electrical and hydraulic systems, fuel systems, and ice and rain protection systems. You will also become familiar with flight and navigation instruments. Students who have completed the corresponding external CASA exam and want to be exempt from Assessment 1 (Quizzes) should contact the Unit Coordinator.
