General Information

Overview

This unit will provide you with the opportunity to showcase your knowledge and analytical skills through a research project on an approved authentic aviation-related topic. You will identify and negotiate appropriate research questions and project objectives, develop a project proposal, conduct a comprehensive literature review, and choose an appropriate methodology to be used for critical analysis, all in a team environment. You will generate solutions to the research questions, and present findings of the analysis in a research report and a formal group presentation to project supervisors and peers. You will defend your project by answering questions raised during the formal presentation. To achieve this, you and your team will work with a designated academic supervisor.
