

BIOL12106 *Molecular Biology*

Term 1 - 2022

Profile information current as at 29/07/2025 03:21 pm

All details in this unit profile for BIOL12106 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit focuses on developing an understanding of how genomes are organised, how they function within the cell, how molecular medical treatments can be developed, ways in which we can manipulate genomes and utilise their components for a range of purposes including medical, agricultural, and commercial.

Details

Career Level: *Undergraduate*

Unit Level: *Level 2*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Prerequisites BIOL11100 Functional Biology or BIOL11102 Life Science Laboratory or BMSC11003 Introduction to Medical Sciences or BMSC11005 Foundations of Biochemistry

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2022

- Mixed Mode
- Rockhampton

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 20%

2. **Practical Assessment**

Weighting: 20%

3. **Online Test**

Weighting: 60%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student feedback - formal unit evaluations

Feedback

The unit content and laboratory experience were interesting and engaging and enhanced student skills

Recommendation

Continue the updated lecture content and laboratory experience.

Feedback from Student feedback - formal unit evaluations

Feedback

Assessment return was delayed

Recommendation

The teaching team is committed to enhancing student feedback and return by improved marking rubrics and prioritising assessment return.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Demonstrate a clear understanding of the structure, organisation, utility and isolation of nucleic acids
2. Demonstrate a clear understanding of the principles of gene cloning and sequencing
3. Accurately review and evaluate the strategies associated with the transformation of micro-organisms, plants and animals
4. Demonstrate safe and efficient laboratory skills in molecular biology
5. Demonstrate knowledge on the applications of molecular biology skills to medical molecular biology.

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks	Learning Outcomes				
	1	2	3	4	5
1 - Written Assessment - 20%					•
2 - Practical Assessment - 20%	•	•		•	
3 - Online Test - 60%	•	•	•		•

Alignment of Graduate Attributes to Learning Outcomes

Graduate Attributes	Learning Outcomes				
	1	2	3	4	5
1 - Communication	•	•	•		•
2 - Problem Solving			•		•
3 - Critical Thinking					
4 - Information Literacy	•	•	•		
5 - Team Work				•	
6 - Information Technology Competence					
7 - Cross Cultural Competence					
8 - Ethical practice				•	
9 - Social Innovation					
10 - Aboriginal and Torres Strait Islander Cultures

Schedule

Week 1 - 07 Mar 2022

Module/Topic	Chapter	Events and Submissions/Topic
Introduction to Molecular Biology	1	
DNA replication	2, 6, 7	

Week 2 - 14 Mar 2022

Module/Topic	Chapter	Events and Submissions/Topic
RNA	3	

Week 3 - 21 Mar 2022

Module/Topic	Chapter	Events and Submissions/Topic
Genome Organisation	5	

Week 4 - 28 Mar 2022

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Nucleic acid isolation, characterisation, PCR and electrophoresis 8, 9

Week 5 - 04 Apr 2022

Module/Topic	Chapter	Events and Submissions/Topic
DNA cloning	8	

Vacation Week - 11 Apr 2022

Module/Topic	Chapter	Events and Submissions/Topic
Break Week		

Week 6 - 18 Apr 2022

Module/Topic	Chapter	Events and Submissions/Topic
Gene Therapy	17	

Week 7 - 25 Apr 2022

Module/Topic	Chapter	Events and Submissions/Topic
DNA Sequencing	9	Literature Review Due: Week 7 Friday (29 Apr 2022) 11:55 pm AEST

Week 8 - 02 May 2022

Module/Topic	Chapter	Events and Submissions/Topic
Residential School		Laboratory Workbook Due: Week 8 Friday (6 May 2022) 11:55 pm AEST

Week 9 - 09 May 2022

Module/Topic	Chapter	Events and Submissions/Topic
Genetically Modified Organisms	15	

Week 10 - 16 May 2022

Module/Topic	Chapter	Events and Submissions/Topic
High throughput analyses	16	

Week 11 - 23 May 2022

Module/Topic	Chapter	Events and Submissions/Topic
Epigenetics	12	

Week 12 - 30 May 2022

Module/Topic	Chapter	Events and Submissions/Topic
Revision		

Review/Exam Week - 06 Jun 2022

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Exam Week - 13 Jun 2022

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Term Specific Information

Molecular biology is an area of biology that focuses on understanding structure and function of molecules in the cell such as nucleic acids and proteins and their role in maintaining cellular function. In this unit we will also explore nucleic acid replication and detection and how a nucleic acid can be delivered to cells and tissues as a therapeutic molecule. Furthermore, the unit will explore how nucleic acid function can be regulated through epigenetic modification. Lectures will be provided on the Rockhampton campus, recorded and accessible through the Moodle site. Online 'Zoom' tutorials will compliment lecture material.

The assessment items for this unit, include:

- (1) a written assessment;
- (2) attendance at the compulsory residential school and completion of a laboratory manual;
- (3) an end of term online test.

Unit Co-ordinator Contact details: Ingrid Christiansen i.christiansen@cqu.edu.au Tel: 07 4930 6518

Assessment Tasks

1 Literature Review

Assessment Type

Written Assessment

Task Description

Gene Therapy is an important area in modern medical research providing novel therapeutic approaches to treat disease. Gene therapy can be categorised in terms of viral or non-viral, use of nanomaterials and biomaterials which complex nucleic acids and allow delivery to the host, using an in vivo or ex-vivo approach. In this assessment you should choose one clinical area of gene therapy research for your essay and undertake literature searches for information on the developments, status and challenges on your chosen topic. You can also compare the gene therapy approaches with other treatment modalities.

Your essay should provide a very brief introductory overview of what Gene therapy is, and then focus on a particular clinical area of your choice, e.g. Cancer, neurological disease, hereditary metabolic diseases as examples and then consider the gene therapy approaches that have been previously used to treat disease in animal models and/or human clinical trials.

In this assessment, you should aim to make use of scientific journal articles and case reports from the past 7 years, to make your work as up-to-date as possible and to obtain the best possible mark. A video presentation on this assessment task will be available on the Moodle site for this unit, to give you further support.

Please note the following details:

- The length of the main body of your essay is 3000 words, excluding references - making the best use of the word allocation is always better than being off-message.
- Text should be word-processed, with appropriate layout and use of headings/sub-headings. Font and line spacing are not part of the assessment criteria, listed below.
- Diagrams should can be used to illustrate specific aspects - (please ensure that you correctly cite/reference all sources of diagrams used, unless they are original and composed by you, since this is an important aspect of academic integrity).
- Please avoid images with very large file sizes, as this will make your essay too large to upload/download (save any images as lower resolution, to decrease the file size).
- The list of references should form the last page or two, at the end of the assessment. Referencing should be in a consistent style - Harvard or APA format is required).
- Please save/upload your file in either a Word or PDF format. .

Assessment Due Date

Week 7 Friday (29 Apr 2022) 11:55 pm AEST

Return Date to Students

Week 9 Friday (13 May 2022)

Weighting

20%

Minimum mark or grade

50%

Assessment Criteria

Title: Write a descriptive, scientific title for the essay. Try and give your work a title that is appropriate to what your final work represents. (P/F)

Introduction: A one paragraph lead-in to immediately capture attention and indicate the material you will cover. (20%)

Discussion: A thorough review of literature on your chosen topic area written using scientific references up to the previous seven years. The discussion should be organised around the scientific development in your chosen topic and highlighting 'landmark' discoveries and challenges in the clinical application of gene therapy. (40%)

Conclusions: In one paragraph summarise the status of the research you have reviewed in this area and any future research directions. (20%)

References: Cite and list all references referred to in your essay. Marks will be awarded for reference quality, citing within the report and listing references correctly at the end of the report. (10%)

Layout: Spelling, Grammar, Style, Accuracy. (10%)

A detailed marking rubric will be available on the Moodle site.

Referencing Style

- [Harvard \(author-date\)](#)
- [American Psychological Association 7th Edition \(APA 7th edition\)](#)

Submission

Online

Learning Outcomes Assessed

- Demonstrate knowledge on the applications of molecular biology skills to medical molecular biology.

2 Laboratory Workbook

Assessment Type

Practical Assessment

Task Description

During the residential school you will be required to perform experimental protocols involving for example transformation of bacteria with plasmid DNA, restriction endonuclease digestion of DNA and amplification of DNA using polymerase chain reaction (PCR). In your residential School laboratory manual you will be expected to complete a workbook and perform experimental calculations, report experimental results and answer questions provided. Clearly label the report with student names and student numbers. The laboratory workbook can be scanned and the workbook can be uploaded onto the Moodle site.

Assessment Due Date

Week 8 Friday (6 May 2022) 11:55 pm AEST

Return Date to Students

Week 10 Friday (20 May 2022)

Weighting

20%

Minimum mark or grade

50%

Assessment Criteria

Assessment will be based on the accuracy of calculations and correctness of answers to questions.

Referencing Style

- [Harvard \(author-date\)](#)
- [American Psychological Association 7th Edition \(APA 7th edition\)](#)

Submission

Online

Learning Outcomes Assessed

- Demonstrate a clear understanding of the structure, organisation, utility and isolation of nucleic acids
- Demonstrate a clear understanding of the principles of gene cloning and sequencing
- Demonstrate safe and efficient laboratory skills in molecular biology

3 Online Test

Assessment Type

Online Test

Task Description

Exact dates to be confirmed and advised via the Moodle page.

Assessment Due Date

The online test will be opened for a specified period of time and close automatically at the completion of the test, or at the due time - whichever comes first.

Return Date to Students

The online test results will become available within two weeks of completion.

Weighting

60%

Minimum mark or grade

50%

Assessment Criteria

Assessment will be based on the accuracy of calculations and correctness of answers to questions.

Referencing Style

- [Harvard \(author-date\)](#)

Online

Learning Outcomes Assessed

- Demonstrate a clear understanding of the structure, organisation, utility and isolation of nucleic acids
- Demonstrate a clear understanding of the principles of gene cloning and sequencing
- Accurately review and evaluate the strategies associated with the transformation of micro-organisms, plants and animals
- Demonstrate knowledge on the applications of molecular biology skills to medical molecular biology.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
