General Information

Overview

This unit will introduce building ergonomics, including its effects on human performance and comfort; "universal access" design considerations; and engineering services associated with residential, low rise commercial and industrial building projects. Using industry regulations, standards and codes of practice, students will examine the principles of building services requirements, installation, operation and maintenance relating to: energy usage and needs; natural, extractive and air conditioning ventilation; natural and artificial lighting; security and communications, hydraulic service supply and disposal systems; fire protection; and acoustics.

Offerings For Term 2 - 2027

- Online

Attendance Requirements

All on-campus students are expected to attend scheduled classes - in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student Feedback

Feedback

Students suggested providing more consistent feedback on assessments.

Recommendation

Student feedback indicated that different markers used different methods for returning feedback (e.g. Turnitin comments and rubrics, uploaded feedback files, or comments in Moodle), which made it difficult for some students to know where to look. In response, the teaching team has standardised and clearly communicated the locations of feedback for each assessment, specifying in the unit profile and on Moodle whether feedback will appear in Turnitin, as an uploaded file, or in a Moodle feedback area. In future offerings, we will provide step-by-step guidance in Week 1 and reminders after each assessment release, showing students exactly how to access their feedback in the designated platform to minimise confusion and improve uptake.

Feedback from Self-reflection

Feedback

Review and update of materials and power point slides in the Moodle.

Recommendation

It is recommended to review and update all course materials and PowerPoint slides in Moodle to ensure content is current, accurate, and aligned with learning outcomes.
