General Information

Overview

This unit will provide you with an understanding of environmentally appropriate design and planning solutions used in new and refurbished multi-story residential and commercial buildings. You will learn about energy and resource efficiency, universal access, building fabric and services audits, and statutory, planning and heritage considerations. You will be required to establish a mentoring relationship with a professional building engineer. You should have completed previous introductory studies in building design to ensure an adequate level of entry.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student Evaluations

Feedback

Students report that the lecturer shares up-to-date industry experience and real-world knowledge.

Recommendation

The unit lecturer is an industry professional who shares real world experience with the students. It is recommended that this lecturer continues to lecture this unit.

Feedback from Student Evaluations

Feedback

Students report that feedback provided by the lecturer on the draft designs and by other students on the assessment forums is very helpful in improving the design.

Recommendation

Feedback will continue to be offered on draft designs and the assessment forums will continue to be offered so that students are able to use feedback to identify issues and improve their designs.
