General Information

Overview

In this unit, you will learn about the history of the building and construction industry, the importance of preparing accurate cost estimates, the basic cost components integral to building projects and the development of cost estimates for projects at different stages of their life cycle including feasibility studies, procurement, retrofitting and 'change of use'. You will have the opportunity to prepare partial cost estimates for competitive tenders, use tendering strategies, discuss successful and unsuccessful tenders, and capture tendering data into cost monitoring systems.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Staff feedback

Feedback

Student response is low

Recommendation

Dedicated time needs to be allocated during class for survey completion. The importance and impact of student feedback require clearly communicated and structured reminders be provided before survey closure.

Feedback from Moodle query

Feedback

Real projects estimating cost as an example

Recommendation

Case studies and learning activities need further refinement to reflect real-world project scenarios, enhancing practical competence and decision-making skills. The Rawlinson Construction Handbook as supporting material to support accurate and industry-relevant cost application and ensure students develop strong, practice-based project estimating.
