BLSV12023 *Fire Safety Design*

Term 3 - 2027

Profile information current as at 17/09/2026 04:16 am

All details in this unit profile for BLSV12023 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit provides an understanding of issues and methods used in fire safety design, develop an appreciation of the role of fire safety engineering in the building industry and be prepared to communicate effectively with professionals in the building industry about fire safety design.

Details

Career Level: *Undergraduate*

Unit Level: *Level 2*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

There are no requisites for this unit.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 3 - 2027

- Online

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Information for Class and Assessment Overview has not been released yet.
This information will be available on Monday 13 September 2027

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Academic Progression Policy and Procedure
- Student Refund and Credit Balance Policy and Procedure
- Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student

Feedback

The real life examples the lecturer uses are very beneficial. Being shown plans from actual projects and photographs of real world inspections provides excellent context and compliments the course content well.

Recommendation

Real-world examples will continue to be included. Filmed fire safety inspections will be added to the content, particularly during lectures/tutorials, to encourage discussion of real-world situations and what to expect during inspections.

Feedback from Lecturer

Feedback

Annotated diagrams and photos of fire safety measures assisted students in understanding complex fire safety measures

Recommendation

study notes and lectures would continue to present fire safety measures in an easy to interpret manner.

Feedback from Lecturer

Feedback

A tutorial was dedicated to examining the post incident example demonstrating the benefits of good fire safety and drawbacks of poor fire safety.

Recommendation

A tutorial will continue to be dedicated to discussing a real life incident related to fire safety to draw distinctions between the technical nature of fire safety measures and the practical responsibility associated with the installation, commissioning and maintenance of these measures.

Unit Learning Outcomes

Information for Unit Learning Outcomes has not been released yet.
This information will be available on Monday 13 September 2027

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Information for Alignment of Learning Outcomes, Assessment and Graduate Attributes has not been released yet.
This information will be available on Monday 13 September 2027

Textbooks and Resources

Information for Textbooks and Resources has not been released yet.
This information will be available on Monday 18 October 2027

Academic Integrity Statement

Information for Academic Integrity Statement has not been released yet.
This unit profile has not yet been finalised.
