General Information

Overview

In this unit, you will study the gross anatomy and physiology of the musculoskeletal, cardiovascular, lymphatic, digestive, respiratory, nervous, endocrine, urinary, and reproductive human body systems. You will apply this knowledge in laboratory sessions using anatomical models and plastinates through a series of practical exercises. You will study homeostatic mechanisms and physiological responses in the human body. In addition, you will gain an appreciation of the integrative nature of anatomy and physiology of the human body with special emphasis on the study of the pelvic region and the lower limbs.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE

Feedback

Students felt they needed more time to review the content of the live lecture prior to attending the internal lab class

Recommendation

Consider allowing more time between lecture and labs for students to review the content

Feedback from SUTE

Feedback

Students appreciated the different resources made available for their study

Recommendation

Continue to update and provide learning resources to cater for different learning styles

Feedback from Self reflection and staff feedback

Feedback

Engagement in the practical activities is important for student learning

Recommendation

Encourage attendance to the lab activities, in addition to self directed study in the labs, to consolidate student learning
