General Information

Overview

This unit expands on your existing knowledge on physiology to explore the physiological aspects of nutrition in human health. In this unit, you will develop further knowledge of the gastrointestinal system and its role in the digestion and absorption of food and nutrients. You will learn about the physiological mechanisms that control appetite and thirst and related health issues. You will learn about the nutrient and energy requirements and evaluate related pathophysiological conditions in different population groups. You will apply your knowledge of nutritional physiology in a professional manner to discuss issues in nutrition and how they impact human health.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit Coordinator's delivery structure survey and SUTE comments

Feedback

Students enjoyed the new weekly learning booklet and found the structure more engaging than the traditional long lecture recordings.

Recommendation

Continue with the weekly learning booklet structure

Feedback from Unit Coordinator's delivery structure survey and SUTE comments

Feedback

Additional discussion of case studies, content-relevant activities and quizzes, and group discussion assignment will be helpful.

Recommendation

Consider including more short lectures to discuss complex concepts, and weekly formative quizzes and knowledge check questions.
