BUSN11019 *Business Systems and Technology*
Term 1 - 2026

Profile information current as at 27/12/2024 03:33 pm

General Information

Overview
This unit will introduce you to business systems and their benefits to companies. Business systems incorporate a series of interdependent tasks or documented procedures that outline exactly how to do something in an organisation to achieve strategic objectives. Good business systems streamline workload, improve productivity and generate results. Business Technology is a concept that describes all technology that helps an organisation run its business, processes and systems. In this unit, you will evaluate and apply Business Technology with knowledge of best practices and concepts and tools that are designed to guide any part of an organisation or business in utilising information technology to its fullest. In addition, you will learn the types of cyber-attacks that may be encountered in business contexts and identify tools and techniques to prevent, detect and respond to those attacks. You will be equipped to build sustainable and resilient businesses that can weather economic, social, and environmental challenges over the long term.
