General Information

Overview

In this unit you will build upon your knowledge of the principles and practice of chiropractic management through the introduction of soft tissue and mobilisation techniques commonly used in chiropractic practice. You will further demonstrate your psychomotor skills through the application of these techniques in practical classes. You will continue to learn about the contemporary status and philosophy of the chiropractic profession as well as the biomechanical principles underpinning the practical procedures you are learning.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Verbal

Feedback

The students like the diversity in the staff delivering the unit. This means that the students are provided a variety of chiropractic techniques that would be suitable for their body anthropometrics due to the diverse staffing.

Recommendation

It is recommended that the discipline continue to build a diverse team of academics.

Feedback from SUTE

Feedback

The students liked the video additions, but would like more resources like this.

Recommendation

It is recommended to continue developing online skills videos for students to access for review.
