General Information

Overview

This unit will build upon your conceptual understanding of the causes, mechanisms and consequences of disease and dysfunction of the cardiovascular, lymphatic, haematopoietic, reproductive, respiratory, endocrine, renal and digestive systems. You will critically evaluate the multifactorial symptoms of dysfunction in order to infer the likely causative pathophysiological condition. Importance will be placed on understanding that different pathologies frequently cause a suite of similar symptoms but can nevertheless be differentiated on the basis of the combination, intensity and development of those symptoms. This knowledge will be used in conjunction with the examination protocols and procedures taught in Clinical Assessment and Diagnosis 3, in order to formulate a differential diagnosis.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from In person and SUTE

Feedback

The students thoroughly enjoyed the weekly in class quiz and felt that it was a fun way to keep up to date with content and allow better recall of the material.

Recommendation

It is recommended that the unit coordinator continue to provide weekly in class quizzes.

Feedback from In person and SUTE

Feedback

The students felt that the written assignment was interesting and added to their learning.

Recommendation

It is recommended that the unit coordinator continue to offer the written assignment case as a learning assessment.

Feedback from In person and SUTE

Feedback

The students felt that the end of term assessment weightage is too high for the unit (60%) .

Recommendation

It is recommended that the unit coordinator review the weightage of the assessments.
