General Information

Overview

This unit introduces object-oriented programming principles extensively. You will learn to develop interactive software applications using a modern programming language, integrated development environment (IDE), and graphical user interface (GUI) components. You will learn how to use classes, objects, methods, inheritance, polymorphism, foundation data structures and exception handling in your application development. In addition, you will learn how to apply these skills in solving practical problems.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student unit evaluation

Feedback

The slides from the textbook are not engaging. More code examples would be better.

Recommendation

Add additional code examples to accompany the slides.

Feedback from Student unit evaluation

Feedback

The readings for a few weeks include two full chapters, which makes the workload unbalanced compared to other weeks.

Recommendation

List the required or optional sections for the chapters in the weekly readings.
