General Information

Overview

Technology is at the forefront of social transformation in the 21st century, reshaping how individuals, organisations, and governments interact. In this unit, you will explore the dynamic relationship between digital technologies and society, with a focus on ethics, governance, and accountability. As an emerging ICT professional, you will critically examine how digital systems can both support societal needs and introduce complex ethical, legal, and governance challenges. Topics include artificial intelligence, cybersecurity, privacy, intellectual property, censorship, workforce disruption, and information overload. You will apply ethical theories and professional codes of conduct to analyse real-world dilemmas and develop persuasive arguments in personal, organisational, and policy contexts. By the end of the unit, you will be equipped to engage with digital governance issues and contribute responsibly to the design and oversight of technology in society.
