

Profile information current as at 19/05/2024 04:49 am

All details in this unit profile for COIT12208 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

# **General Information**

#### Overview

In this unit, you will learn key concepts of Information and Communication Technology Project Management from both a traditional waterfall and Agile perspective. You will apply project management principles and use project management software with the aim of delivering successful projects. Industry standards, quality assurance, professional ethics, social, cultural, and legal issues relevant to the theories and principles of project management will also be covered.

### Details

Career Level: Undergraduate

Unit Level: Level 2 Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

# Pre-requisites or Co-requisites

Pre-requisite: COIT11226 Systems Analysis Anti-requisite: COIS13064 ICT Project Management Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the <a href="Assessment Policy and Procedure">Assessment Policy and Procedure (Higher Education Coursework)</a>.

# Offerings For Term 1 - 2024

- Brisbane
- Cairns
- Melbourne
- Online
- Rockhampton
- Sydney
- Townsville

# Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

#### Website

This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.

# Class and Assessment Overview

### Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

# Class Timetable

#### **Regional Campuses**

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

#### **Metropolitan Campuses**

Adelaide, Brisbane, Melbourne, Perth, Sydney

# **Assessment Overview**

 Weighting: 30%
 Online Quiz(zes)
 Weighting: 30%

3. Written Assessment

Weighting: 40%

# Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the <u>University's Grades and Results Policy</u> for more details of interim results and final grades.

# **CQUniversity Policies**

#### All University policies are available on the CQUniversity Policy site.

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the CQUniversity Policy site.

# Previous Student Feedback

# Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

### Feedback from Unit Evaluation

#### **Feedback**

Students expressed high satisfaction with the unit content and structure.

Continue to run the unit with the current style and format.

#### Feedback from Unit Coordinator self-reflection and students' verbal feedback

Too much work for 15% in Assessment 2 Quiz 1.

#### Recommendation

Revise Assessment 2 Quiz 1 and reduce the number of questions.

# **Unit Learning Outcomes**

#### On successful completion of this unit, you will be able to:

- 1. Apply Agile project scoping, scheduling, and velocity management tools and procedures
- 2. Apply predictive project planning, scheduling, and resource management tools and procedures
- 3. Evaluate project status and recommend appropriate corrective action where necessary
- 4. Assess the ethical, social, cultural, and legal impacts of projects on diverse stakeholders.

Australian Computer Society (ACS) recognises the Skills Framework for the Information Age (SFIA). SFIA is in use in over 100 countries and provides a widely used and consistent definition of ICT skills. SFIA is increasingly being used when developing job descriptions and role profiles.

ACS members can use the tool MySFIA to build a skills profile at https://www.acs.org.au/professionalrecognition/mysfia-b2c.html This unit contributes to the following workplace skills as defined by SFIA. The following version 7 SFIA codes are included:

- Strategic planning ITSP
- Business analysis BUAN
- Project management PRMG
- Programme management PGMG
- Portfolio management POMG
- Change management CHMG
- Requirements definition and management REQM
- Information systems coordination ISCO
- Systems development management DLMG

# Textbooks and Resources

# **Textbooks**

There are no required textbooks.

# **IT Resources**

# You will need access to the following IT resources:

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)
- Microsoft Project
- Webcam and headset
- Access to Microsoft Visio
- Access to Microsoft Office
- Taiga server
- Node.js including JSHint, c8 and sloc

# Referencing Style

All submissions for this unit must use the referencing style: <u>Harvard (author-date)</u> For further information, see the Assessment Tasks.

# **Teaching Contacts**

## **Assessment Tasks**

# 1 ADAPTIVE PM PRESENTATION

### **Assessment Type**

Presentation

#### **Task Description**

Each student's assignment will be assessed individually. The provided version of the assignment is condensed, and the complete version can be found on the unit website.

#### **Objectives**

The objective of this assignment is to provide you with practical experience in adaptive project management. Your role will be that of a project manager overseeing an adaptive ICT project. You will be responsible for a range of tasks, including but not limited to:

- · Create and maintain a product backlog
- Develop a sprint plan
- Manage risk issues and
- Present a sprint review.

The project is scheduled to be completed in 2 sprints. The first sprint has already been finished, and now it's time to review it and plan for the second sprint.

#### 1. Create a plan to reflect the project's progress

At the end of Sprint 1, you will receive a project plan and development files for an ICT project. Your task is to use the designated project management tool to create a plan that accurately reflects the progress made so far.

### 2. Create Sprint 2 Plan

You need to create a plan for Sprint 2.

#### 3. Present Sprint 1 Review and Sprint 2 Plan

You will present a review of Sprint 1 and your Sprint 2 plan.

You will have 10-15 minutes to present your project. You must record and submit your presentation and the taiga project file (\*.ison). Your recorded video should be framed to include the presenter, your audience (if any), and your desktop.

Sharing ideas about project management concepts and techniques between individuals is encouraged. Any ideas you

reuse should be referenced. Sharing project management files or copying, for example, user stories, subtasks, issues, or controls, between individuals will be considered plagiarism. If you doubt whether you can share something, first obtain email consent from your lecturer.

This assignment will be submitted online through the Moodle unit website.

The full specification for this assessment and the marking criteria are available on the Moodle unit website.

#### **Assessment Due Date**

Week 5 Friday (5 Apr 2024) 11:00 pm AEST All submissions are due by the deadline.

#### **Return Date to Students**

Week 7 Friday (26 Apr 2024)

Within 2 weeks of the due date or within 2 weeks of submission (whichever is the later)

#### Weighting

30%

#### **Assessment Criteria**

For this task, you will be assessed individually. Your work will be evaluated based on how well you implement and present various elements, including Backlog, User Stories, Sprint Plans, Taskboard, Issues, Individual Presence, and Presentation Content. You can find a comprehensive marking template on the unit website along with the assignment details.

### **Referencing Style**

• Harvard (author-date)

#### **Submission**

Online

#### **Submission Instructions**

Please retrieve your project plan from the project management tool and upload it to the unit website. Remember to include either a video or a link to your video, as well as the taiga project file (\*.json). Please note that plagiarism is strictly prohibited and will be handled in accordance with University policy. Any incomplete submissions, such as those with insufficient permissions or corrupt files, may not be graded or may receive a late penalty. Students who do not present will not receive any marks for the presentation portion of the assessment.

#### **Learning Outcomes Assessed**

- · Apply Agile project scoping, scheduling, and velocity management tools and procedures
- Assess the ethical, social, cultural, and legal impacts of projects on diverse stakeholders.

#### **Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking
- Information Technology Competence

### 2 Quizzes

#### **Assessment Type**

Online Quiz(zes)

#### **Task Description**

For the complete version of the assignment, kindly check out the unit website as this is just a summarized version.

### **Time Management**

To prepare for Quiz 1, kindly complete all the activities in the unit, including those in Week 4. You can take Quiz 1 once you have finished the Week 5 activities. We suggest using the non-teaching week between Weeks 5 and 6 to put the finishing touches on Quiz 1.

To prepare for Quiz 2, kindly make sure to complete all the activities for the unit, including Week 7. Only after finishing the Week 8 activities, you can attempt Quiz 2. It's recommended that you use the weekend after Week 8 to perfect Quiz 2.

#### **Objectives**

The purpose of this task is to provide you with hands-on experience in quality and risk management, as well as

predictive project management. Your task is to carry out project management duties for a series of project scenarios and simulations.

#### **Task Description**

You will manage project constraints such as quality, risk, scope, schedule, human resources, and stakeholders using, for example, MS Project and MS Excel. You will create recommendations to manage or correct project issues proactively. You will complete scenarios such as the following:

- Model scenarios using MS Project
- Manage to schedule using the Critical Path Method (CPM).
- Manage quality using Fault Tree Analysis (FTA)
- Create and interpret control charts
- Calculate Risk Leverage Factors to assess the cost of risk responses
- Calculate Expected Monetary Values (EMV, not EVM) to assess risk responses
- Calibrate a COCOMO model to predict the duration of a project
- Apply PERT and Monte Carlo to understand a project's duration better and
- Manage schedule and costs with Earned Value Management (EVM) techniques

The scenarios will be distributed to you in two quizzes.

#### Quiz 1

- Attempts: Although multiple submissions are possible; only the last submission of Quiz 1 will be marked.
- Feedback: You will receive feedback for Quiz 1 two weeks after the due date.
- Availability: Quiz 1 will be available by Week 4.
- Weight: Quiz 1 is worth 15% of the unit.

#### Quiz 2

- Attempts: You have unlimited attempts at Quiz 2 until the deadline; only the last submission of Quiz 2 will be marked.
- Feedback: Quiz 2 feedback is provided after each submission of the quiz.
- Availability: Quiz 2 will be available by Week 7.
- Weight: Quiz 2 is worth 15% of the unit.

#### **Plagiarism**

Please note that this assignment will be assessed individually, and any sharing of files related to this task will be considered plagiarism. Please ensure that all submissions are original, as they will be thoroughly checked for plagiarism.

#### **Number of Quizzes**

2

#### **Frequency of Quizzes**

Other

### **Assessment Due Date**

Please note that the quizzes have varying due dates. Quiz 1 must be completed by Sunday of Week 6 at 11:00 PM, while Quiz 2 is due by Sunday of Week 9 at the same time.

#### **Return Date to Students**

The feedback for Quiz 1 will be given back in Week 8. As for Quiz 2, you will receive feedback after every submission. Please note that both quizzes' feedback and marks may change during the moderation process.

#### Weighting

30%

#### **Assessment Criteria**

Your assignment will be assessed individually, with evaluation based on various aspects (see the following table). The majority of criteria will be weighted similarly, so refer to the quizzes for question weights. However, certain criteria, such as those related to managing scope and schedule in **MS Project**, and **utilising EVM for cost management**, will carry more weight.

Criteria Description

Calculating risk leverage factors in assessing the costeffectiveness of risk responses

Correct calculations

Create or interpret a decision tree and calculate expected monetary values to assess risk response options

Focus quality management through Fault Tree Analysis

Identify issues with testing and development processes by calculating defect rates

Collect ICT project metrics such as defect rates, SLOC and cyclomatic complexity

Focus code reviews through analysis of cyclomatic complexity

Predict the number of escaped bugs in a system

Develop or interpret run charts and control charts to analyse trends in project metrics, e.g. defect rates and requirements volatility

Focus quality management by developing and interpreting Pareto charts

Correct analysis of the scenario. Correct calculations. Appropriate interpretation of results.

Correct analysis of the scenario and calculations

Appropriate interpretation and recommendations. Correct calculations.

Correct metrics collected and identified.

The correct interpretation of the scenario and general and specific function recommendations.

The correct interpretation of the scenario and correct calculations.

Appropriate interpretation and recommendations. Recommendations consider the context of the project. Trend lines only include relevant data. Correct calculations. Charts have appropriate titles, legends and units. Charts use correct data.

Appropriate interpretation and recommendations. The analysis is specific to the generated results. Correct calculations. Charts have appropriate titles, legends and units. Charts use correct data.

#### **Referencing Style**

• Harvard (author-date)

#### **Submission**

Online

#### **Submission Instructions**

To fulfill the quiz requirements, kindly complete them via the unit website. You can upload necessary files and provide written responses within the quizzes.

#### **Learning Outcomes Assessed**

- Apply predictive project planning, scheduling, and resource management tools and procedures
- Evaluate project status and recommend appropriate corrective action where necessary
- Assess the ethical, social, cultural, and legal impacts of projects on diverse stakeholders.

#### **Graduate Attributes**

- Problem Solving
- Critical Thinking
- Information Technology Competence
- Ethical practice

# 3 Case Study

#### **Assessment Type**

Written Assessment

#### **Task Description**

This particular assignment will be evaluated individually, and it accounts for 40% of the overall marks for this unit. The main objective of this assessment is for you to provide a response to a case study, which you can find the details of, along with the task description and requirements, on the unit website. Should you have any inquiries regarding this assessment, please seek assistance from your local Lecturer, Tutor, or Unit Coordinator.

Submission: Online - Individual

#### **Assessment Due Date**

Week 12 Friday (31 May 2024) 11:00 pm AEST

Please ensure that all submissions are turned in by the designated deadline.

### **Return Date to Students**

Exam Week Friday (14 June 2024)

You have a two-week window to submit your work, either from the due date or from the date of submission (whichever

comes later).

#### Weighting

40%

#### **Assessment Criteria**

The assessment for this assignment is done on an individual basis. The criteria for evaluation encompasses various aspects, including the quality of answers provided for the Case Study questions, report formatting, and referencing mechanics. For more information, a comprehensive marking template will be accessible on the unit website alongside the assignment details.

### **Referencing Style**

• Harvard (author-date)

#### **Submission**

Online

#### **Submission Instructions**

To submit your assessment, simply click on the appropriate submission link available on the Moodle unit website.

#### **Learning Outcomes Assessed**

- Apply Agile project scoping, scheduling, and velocity management tools and procedures
- Apply predictive project planning, scheduling, and resource management tools and procedures
- Evaluate project status and recommend appropriate corrective action where necessary

#### **Graduate Attributes**

- Problem Solving
- Critical Thinking

# **Academic Integrity Statement**

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the **Student Academic Integrity Policy and Procedure**. This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

#### What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

#### Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

#### Where can I get assistance?

For academic advice and guidance, the <u>Academic Learning Centre (ALC)</u> can support you in becoming confident in completing assessments with integrity and of high standard.

#### What can you do to act with integrity?

#### **Be Honest**

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

#### Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

#### **Produce Original Work**

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
