COIT20248 *Information Systems Analysis and Design*

Term 3 - 2026

Profile information current as at 23/01/2025 01:18 pm

All details in this unit profile for COIT20248 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

Information systems analysis and design is a complex, challenging, and stimulating organisational process, that a team of business and systems professionals use to develop and maintain computer-based information systems. In this unit, you will learn the importance of responding to and anticipating problems through the innovative use of systems development process. You will learn how understanding user-centered design and task-centered design are fundamental to good systems design. In order to understand these concepts, you will study how to determine user-requirements and convert user requirements to system design. You will demonstrate this understanding by designing web-interfaces of given case studies and practical examples. You will study different phases of the systems development life cycle, which includes developing a system proposal, determining user requirements, designing a system, and applying key principles to the implementation of a system. You will also explore the organisational context and the iterative nature of systems analysis and design.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from In class

Feedback

Some assessments in the unit are generic and can be easily replicated, reducing their effectiveness in evaluating individual understanding and application of concepts.

Recommendation

Update the assessments to better measure each student's understanding by using tasks that encourage original thinking and individual work.

Feedback from Unit Coordinator

Feedback

To include contemporary content.

Recommendation

To incorporate more recent knowledge and up-to-date information into the unit content.
