General Information

Overview

This unit offers the foundational communication skills, expectations, and ethical considerations that shape the role of Information and Communications Technology (ICT) professionals, also called digital professionals. Through hands-on activities, you will learn to communicate professionally, both in written and verbal forms, fostering clear and persuasive communication. The unit delves into strategies for effective interpersonal communication within team settings, promoting collaborative teamwork and conflict resolution. It equips you to develop and deliver effective oral presentations underpinned by critical thinking. In addition, this unit strongly emphasises ethics and codes of conduct in the ICT profession. You will apply ethical principles to real-world ICT scenarios, demonstrating ethical, legal, and societal decision-making competencies. Through a blend of theory and practical in-class activities, you will be well-prepared to navigate the multifaceted landscape of ICT professionalism.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit Coordinator's Reflection

Feedback

The use of generative artificial intelligence for professional communication has left students uncertain about how to effectively utilise this technology, raising questions about genuine interactions.

Recommendation

Consider introducing an in-class activity or assessment about GenAI use that prompts reflection.

Feedback from Unit Coordinator's Reflection

Feedback

Currently, feedback on assessments is provided without the use of marking rubrics, which may reduce clarity around expectations and assessment criteria.

Recommendation

Introduce marking rubrics for assessments to make expectations more transparent, ensure consistency, and support higher-quality feedback.
