General Information

Overview

Knowledge management is being reshaped by artificial intelligence, enterprise platforms, digital collaboration tools and data-informed decision-making. This unit examines how organisations identify, capture, structure, share, and govern knowledge in contemporary business environments. You will develop high-level capabilities in knowledge audits, knowledge mapping, knowledge asset identification, knowledge flow analysis and knowledge management practices. The unit examines how knowledge management supports business analysis, enterprise systems, organisational learning, decision-making quality and operational improvement. You will evaluate contemporary knowledge management systems and processes, including enterprise knowledge platforms, knowledge bases, collaboration tools and AI-supported knowledge practices. The unit also considers ethical, professional, privacy, security and accountability issues associated with organisational knowledge work. Through applied assessment tasks, you will analyse an organisational knowledge problem, evaluate suitable tools and techniques, and develop a knowledge management plan that supports organisational needs and responsible AI-enabled practice.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit coordinator observation

Feedback

There was limited integration of practical tools in the tutorials aligned with the weekly content.

Recommendation

Introduce relevant tools and practical tasks in weekly tutorials from the start of term, supported by resources that help students apply them independently and connect learning to real practice.
