

COIT20260 *Cloud Computing and Internet of Things for Smarter Applications*

Term 1 - 2024

Profile information current as at 05/09/2024 02:43 pm

All details in this unit profile for COIT20260 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

Emerging technologies, such as cloud computing and the Internet of Things (IoT), enable you to rapidly design, develop and deploy smart applications. In this unit, you are introduced to the software, devices, and techniques supporting these technologies. You will learn the fundamentals of cloud computing as well as various cloud environments and services, such as Infrastructure as a Service (IaaS), Platform as a Service (PaaS) and Software as a Service (SaaS). You will use a Platform as a Service (PaaS) cloud environment, gaining practical experience in designing, developing and deploying smarter cloud-based applications.

Details

Career Level: *Postgraduate*

Unit Level: *Level 9*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Pre-requisite units: COIT20245 Introduction to Programming and COIT20246 ICT Services Management

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2024

- Online

Attendance Requirements

All on-campus students are expected to attend scheduled classes - in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 20%

2. **Group Work**

Weighting: 30%

3. **Project (applied)**

Weighting: 50%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student evaluations

Feedback

More practical-based assignments would be highly advantageous.

Recommendation

Introduce additional cloud/IoT practical activities into assessments.

Feedback from Student evaluations

Feedback

Improved student access to the cloud environments such as Microsoft Azure or IBM that are used in the unit

Recommendation

Identify the cloud environment with the best student access so it can be integrated into the unit activities.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Evaluate cloud computing concepts and IoT components for smart applications/systems development
2. Analyse the application of cloud computing and IoT technologies in different scenarios
3. Design and develop cloud based smart applications for business solutions
4. Deploy a smart application using cloud computing and IoT technologies.

The Australian Computer Society (ACS) recognises the Skills Framework for the Information Age (SFIA). SFIA is adopted by organisations, governments and individuals in many countries and provides a widely used and consistent definition of ICT skills. SFIA is increasingly being used when developing job descriptions and role profiles. ACS members can use the tool [MySFIA](#) to build a skills profile.

This unit contributes to the following workplace skills as defined by [SFIA 7](#) (the SFIA code is included)

- Systems design (DESN)
- Systems integration and build (SINT)
- Programming/software development (PROG)
- Testing (TEST)
- Release and deployment (RELM)
- Application support (ASUP)
- Solution architecture (ARCH)
- IT infrastructure (ITOP)

Schedule

Week 1 - 04 Mar 2024

Module/Topic	Chapter	Events and Submissions/Topic
Fundamentals of Cloud Computing and IoT	Chapters 1 and 2 from 'Foundations of Modern Networking: SDN, NFV, QoE, IoT and Cloud 1st Edition, by William Stallings.'	Setting up Azure Student Accounts

Week 2 - 11 Mar 2024

Module/Topic	Chapter	Events and Submissions/Topic
Cloud Delivery and Deployment Models	Chapters 1 and 2 from 'Foundations of Modern Networking: SDN, NFV, QoE, IoT and Cloud 1st Edition, by William Stallings.'	Cloud Computing Lab 1 & Demo

Week 3 - 18 Mar 2024

Module/Topic	Chapter	Events and Submissions/Topic
Data Centers & Managing Data in the Cloud	Chapter 5 from 'Cloud Computing: Concepts, Technology & Architecture by Erl, T., Mahmood, Z., and Puttini R.'	Cloud Computing Lab 2

Week 4 - 25 Mar 2024

Module/Topic	Chapter	Events and Submissions/Topic
Cloud Architecture and Design Patterns	Chapters 11 and 12 from 'Cloud Computing: Concepts, Technology & Architecture by Erl, T., Mahmood, Z., and Puttini R.'	Cloud Computing Lab 3

Week 5 - 01 Apr 2024

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Cloud Computing and Virtualization	Chapters 7, 8 and 9 from 'Foundations of Modern Networking: SDN, NFV, QoE, IoT and Cloud 1st Edition, by William Stallings'	Cloud Computing Lab 4, Assignment 1- Due: 05/04/2024 11:45 pm Written Assessment -Evaluation of Cloud Services Due: Week 5 Friday (5 Apr 2024) 11:45 pm AEST
------------------------------------	---	---

Vacation Week - 08 Apr 2024

Module/Topic	Chapter	Events and Submissions/Topic
Session Break	Session Break	Session Break

Week 6 - 15 Apr 2024

Module/Topic	Chapter	Events and Submissions/Topic
Cloud-based Networking & Security	Chapters 6 and 10 from 'Cloud Computing: Concepts, Technology & Architecture by Erl, T., Mahmood, Z., and Puttini R.'	Cloud Computing Lab 5

Week 7 - 22 Apr 2024

Module/Topic	Chapter	Events and Submissions/Topic
Edge & Fog Computing and IoT	Lecture Slides	Tutorial/Lab

Week 8 - 29 Apr 2024

Module/Topic	Chapter	Events and Submissions/Topic
AI on the Cloud	Lecture Slides	AI on the Cloud Lab,, Assignment 2- Due:03/05/2024 11:45 PM Group Work- Research Report Due: Week 8 Friday (3 May 2024) 11:45 pm AEST

Week 9 - 06 May 2024

Module/Topic	Chapter	Events and Submissions/Topic
IoT, Cloud and Digital Twins	Lecture Slides	Tutorial/Lab

Week 10 - 13 May 2024

Module/Topic	Chapter	Events and Submissions/Topic
Management & Governance of Cloud, IoT and Big Data	Chapters 1 and 4 from 'The Internet of Things: How Smart TVs, Smart Cars, Smart Homes and Smart Cities Are Changing the World by Miller, Michael'	Tutorial/Lab

Week 11 - 20 May 2024

Module/Topic	Chapter	Events and Submissions/Topic
Smart Problems and Smart Businesses	Chapters 12, 14 and 15 from 'The Internet of Things: How Smart TVs, Smart Cars, Smart Homes, and Smart Cities Are Changing the World by Miller, Michael'	Tutorial/Lab

Week 12 - 27 May 2024

Module/Topic	Chapter	Events and Submissions/Topic
Revision	Lecture Slides	Revision, Assignment 3- Due:31/05/2024 11:45 pm - Smart Application Development Due: Week 12 Friday (31 May 2024) 11:45 pm AEST

Review/Exam Week - 03 Jun 2024

Assessment Tasks

1 Written Assessment –Evaluation of Cloud Services

Assessment Type

Written Assessment

Task Description

This individual assignment revolves around the exploration and evaluation of two prominent Platform as a Service (PaaS) cloud providers - Amazon Web Services (AWS) and Microsoft Azure. The primary objective is to analyze and compare the services offered by each provider, with a specific focus on their Infrastructure as a Service (IaaS), SaaS and PaaS capabilities. . You are also required to create a simple

application in each of the cloud services as part of your comparative exercise. The assignment requires you to:

1. Explore and document the array of services offered by Amazon Web Services (AWS) in the PaaS and IaaS domains.;
2. Evaluate the strengths and weaknesses of each provider to make informed recommendations based on the business scenario provided.;
3. create a simple application in both of the cloud providers; and
4. prepare a report based on the given criteria in the assessment specification.

Detailed information about this assignment can be accessed from the Moodle unit website.

Assessment Due Date

Week 5 Friday (5 Apr 2024) 11:45 pm AEST

Online via Moodle

Return Date to Students

Week 6 Friday (19 Apr 2024)

Online via Moodle

Weighting

20%

Assessment Criteria

Exploration of Cloud Services (20 points)

Comparison of Providers (30 points)

Sample Application (20 points)

Report Preparation (30 points)

The detailed marking criteria and rubrics will be provided in the assessment description on Moodle.

Referencing Style

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills

Learning Outcomes Assessed

- Evaluate cloud computing concepts and IoT components for smart applications/systems development
- Analyse the application of cloud computing and IoT technologies in different scenarios

2 Group Work- Research Report

Assessment Type

Group Work

Task Description

Task Description

This group assignment must be accomplished in a group of 3 members. The assignment requires you to select a topic from a given list and research on that topic. You should find scholarly articles (e.g. published journal articles, books, conference papers) and report current scientific developments relevant to the topic. The investigation should be done in a team environment that requires you to:

1. choose a topic from the given list based on the given instructions in the assessment specification;
2. research multiple scholarly resources to report the scientific developments relevant to the topic and
3. prepare a report according to the given guidelines in the assessment specification.

Detailed information about this assignment can be accessed from the unit website in Moodle.

The list of topics and rubrics will be provided in a detailed assessment description via Moodle.

Assessment Due Date

Week 8 Friday (3 May 2024) 11:45 pm AEST

online via Moodle

Return Date to Students

Week 10 Friday (17 May 2024)

online via Moodle

Weighting

30%

Assessment Criteria

Research (50 points):

Comprehensive identification of scholarly resources.

Critical evaluation of selected resources.

Proper citation and referencing.

Scientific Developments Reporting (50 points):

Thorough reporting of current scientific developments.

Clear articulation of significance and implications.

Integration of findings from multiple sources.

Adherence to given guidelines.

Clear and organized report structure.

Effective communication of collective findings.

The detailed marking criteria and rubrics will be provided in the assessment description on Moodle.

- Communication

- Research
- Leadership

Learning Outcomes Assessed

- Evaluate cloud computing concepts and IoT components for smart applications/systems development
- Analyse the application of cloud computing and IoT technologies in different scenarios
- Design and develop cloud based smart applications for business solutions

3 - Smart Application Development

Assessment Type

Project (applied)

Task Description

In Assignment 3, you will continue working with the same group as your Assignment 2. In this assignment, you are required to analyse a given implementation scenario and issues within it and come up with an intelligent application that will address the

identified issues. You will write a report and create an online video demo to demonstrate the process you followed to create the smart application. The

the assignment requires you to:

1. analyse the given business case and identify issues associated with the business;
2. design a smart application-based solution to address the identified issues;
3. develop and deploy the application on the Cloud and
4. prepare a report (as per the instructions given in the assignment specification) to illustrate your activities during the smart application development.

Detailed information about this assignment can be accessed from the Moodle unit website

Learning Outcomes Assessed

- Design and develop cloud based smart applications for business solutions
- Deploy a smart application using cloud computing and IoT technologies.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
