COIT20262 *Advanced Network Security*

Term 2 - 2026

Profile information current as at 28/12/2024 12:45 am

All details in this unit profile for COIT20262 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit, you will learn how to protect the confidentiality, integrity and availability of information and network services in business organisations. You will study the fundamental cryptographic techniques that many of the security mechanisms are built upon. You will also study network security attacks, including malware, denial of service, and application vulnerabilities, and the corresponding countermeasures. Through computer laboratory activities, you will gain hands-on experience in analysing attacks and deploying defences, including securing web applications, establishing access control mechanisms, and applying encryption in wired and wireless networks.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student feedback

Feedback

Students found the in-class quizzes challenging because they varied greatly in terms of difficulty and time required to complete them.

Recommendation

Examine the timing and questions of every in-class quiz and provide students more guidance ahead of time.

Feedback from Student feedback, including Unit Evaluation

Feedback

Applications such as VirtualBox, which are utilised in the unit, are incompatible with Mac computers, posing a challenge for few students in completing their assignments.

Recommendation

Mention clearly that Windows is the only environment supported by the teaching team as the computer labs only have Windows. Consider to migrate from VirtualBox to cloud environment.
