General Information

Overview

This unit extends your basic knowledge of the theoretical underpinnings of criminology by considering a broad range of interdisciplinary contemporary theories of crime and penology. You will investigate how these theories can inform research, legislation, law enforcement and regulatory responses to crime. You will examine theoretical and practical case studies to consider how different theoretical approaches may lead to different and perhaps contradictory outcomes. This unit will also develop your methodological analysis skills, examining qualitative and quantitative data to test models suggested by theories of crime.
