General Information

Overview

Youth is the period between childhood and adult age. Understanding youth is the focus of this unit. This understanding is developed through an opportunity to examine a number of complex issues pertaining to being an adolescent in Australian society. These examinations include an analysis of the role secondary school teachers have on developing effective skills to increase student engagement and achievement in all discipline areas and how these may affect learning. In this unit, you will demonstrate knowledge and understanding of research into how students learn, how issues pertaining to youth impact their engagement in learning and the implications for teachers' resilience and school wide approaches. You will have the opportunity to demonstrate knowledge of teaching strategies that are responsive to the learning strengths, needs, and support the wellbeing of students from diverse linguistic, cultural, religious and socioeconomic backgrounds through an exploration of research and critical reflection of your current and future teaching practice.
