## General Information

### Overview

Geotechnical Engineering Design will enable you to develop and apply your knowledge of Australian Standards and/or relevant guidelines to analyse and design advanced geotechnical engineering structures involving a broad range of investigations. You will learn to use computer software to analyse and design the geotechnical components; conduct site investigations; test and characterise geotechnical materials, design foundations, and earth retaining structures; and make assessments of geotechnical stability. Considering stakeholders and sustainability requirements, you will formulate, plan, manage, and complete projects individually and in teams in an ethical and professional manner by. You will also document and communicate engineering information using appropriate language for a professional engineer.
