General Information

Overview

In this unit, you will explore the critical role of engineers in community solutions, focusing on the relationship between engineering and the social and natural world, stakeholder collaboration, and sustainable solutions with safety practices. You will learn how to conduct a community needs assessment, apply human-centred design methods, and develop community-empowered solutions. You will develop skills to strategically engage community groups and individuals and manage their involvement as stakeholders in engineering projects. Emphasis is placed on understanding the social, cultural, and environmental contexts in which engineering solutions are applied. The unit prepares engineers to create positive and lasting impacts, fostering social innovation and betterment that supports the United Nations Sustainable Development Goal 11: Sustainable cities and communities.
