General Information

Overview

The rapid development of technology continually influences and challenges how engineers practice. In this unit, you will learn about cutting-edge engineering projects incorporating multi-disciplinary teams, innovative methods to advance the United Nation's Sustainable Development Goals, and the application of big data, artificial intelligence, and the Internet of Things. The unit will also present future expectations for practicing engineers such as becoming a Registered Professional Engineer, understanding risk management in a changing world, complying with legislation, and promoting safety in engineering design and workplace operations.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from In-class feedback

Feedback

Students appreciated the clear and detailed assessment requirements provided on Moodle, as well as the extensive guidance and support offered for each assessment task.

Recommendation

This good practice should be continued.

Feedback from Unit evaluation dashboard

Feedback

Students have reported that the useful knowledge and skills gained from this unit require improvement.

Recommendation

In the next offering, additional information and resources should be integrated into the unit to enhance the students' learning experience and better utilise their knowledge and skills.

Feedback from Unit evaluation dashboard

Feedback

Students suggested improvements in the feedback provided on their assessment tasks to help them better learn from their performance and enhance their understanding.

Recommendation

In the next offering, online quiz questions should include feedback on student's answers. Additionally, more specific feedback should be provided on the Discussion Forums and Project (report) assessments to help students understand their mistakes and learn from them.
