General Information

Overview

This capstone unit will allow you to apply knowledge of data sets, data analysis, environmental constraints and mine design to a feasibility study for a proposed mining operation. You will enhance your understanding of drilling and blasting operations and data analysis to optimise the safety and productivity of a proposed mining project. You will develop a stakeholder management plan that enhances the operation's social licence to operate. You will apply schedules to the project to optimise the rate of return on the project balancing capital expenditure against forecast revenues.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from UC Reflection

Feedback

Students' engagement in learning.

Recommendation

Students' engagement methods should be included, such as mandatory class quizzes and students' feedback using a discussion forum.

Feedback from UC Reflection

Feedback

More industry engagement is required.

Recommendation

As this is a 12-credit capstone unit, greater industry engagement should be included to involve students in knowledge and real-world problem-solving.
