General Information

Overview

Materials used in the aviation industry have become ever diverse, more sophisticated, and very important as aerospace technologies developed rapidly. The selection of materials in the aircraft industry has a significant impact on all stages of aircraft life from the initial design phase, to manufacturing, flight operations, and maintenance, and when decommissioning. In this unit, you will learn about the principles and fundamentals of materials science and engineering. You will apply this knowledge to various types of advanced materials in aviation.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Verbal feedback

Feedback

The literature review assessment item could be challenging for those that have not done a similar assessment item or those that have not done a thesis unit.

Recommendation

More thorough information should be provided and discussed about the nature of the literature review and the purpose of the assessment item.
