General Information

Overview

This unit is the foundation unit for students completing the Financial Planning stream and covers the professional financial planning process, including the Australian legal framework and the responsibilities of financial planners. You will learn how to investigate a client's financial situation and turn the core elements of financial planning into a strategic financial plan. You will also be introduced to financial planning software, tools and templates used in real-world financial planning practice as well as communication methods aimed at building long term client relationships.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student evaluations

Feedback

If submitting an assessment in two parts, it would be more effective to separate them into individual documents rather than combining them into a single file.

Recommendation

Will implement this recommendation for 2025 and beyond.

Feedback from Student evaluations

Feedback

Have optional workshops for people new to financial planning

Recommendation

Unit coordinator to continue to offer pre-arranged one-on-one Zoom sessions for those new to financial planning, which is more productive than having set consultation times, when nobody may turn up.

Feedback from Student evaluations

Feedback

Navigating and finding content on Moodle was considered difficult and confusing. To quote the student: .."it felt like it was a bit of this here and bit of that there and so on.."

Recommendation

Returning to a prescribed textbooks might solve the problem of student struggling to find information given there is an index, and eBooks have good search functions.

Feedback from Self-reflection

Feedback

Some students are dissatisfied with the unit coordinator developed content that comes from several different references and sources

Recommendation

Returning to textbooks will give students more content structure, and detail in one resource, rather than expecting them to access several different resources or sources of knowledge and information to learn from.
