General Information

Overview

This unit covers the basic concepts, tools and techniques that financial managers use in the contemporary business context. You will learn about the principle functions of financial managers, the different business structures, and capital markets and financial securities. You will also examine the valuation of investments and portfolio, project evaluation, the cost of capital, market efficiency, risk management, basics of foreign exchange and international financial market, and dividend policy. Completion of the unit will raise your awareness on how businesses and corporate organisations decide on short and long term investment decisions, and the global and domestic economic and contextual factors which influence these decisions.
