General Information

Overview

For decades society has been grappling with the deleterious impact of the human population on the Earth. How does society move forward in the wake of climate change and the sixth great extinction? How do we turn around the Anthropocene Epoch so that the balance of nature is restored and respected? In this unit, you will immerse yourself in the philosophy of Environmental Ethics and the Rights of Nature. You will explore how Environmental Policy is formulated and influenced and investigate emerging approaches, such as Nature-Based Solutions. In this unit, you will lay a solid theoretical grounding for further studies of the environment and geography and be a policy-ready influencer on graduation.
