General Information

Overview

This unit explores the dynamics of change in a business environment of volatility, uncertainty, complexity and ambiguity. You will gain a critical understanding of the different perspectives to leading and managing organisational change, and the theories and models that underpin them. The unit also examines how organisations respond to the pressures of the turbulent business environment to remain competitive. You will consider the concept of change-agility as a useful ideal at which business can aim, and the pace at which organisations can innovate or adapt in the interests of long-term viability.
