General Information

Overview

This unit explores the physiological, uncomplicated progression of the childbearing continuum and introduces you to the foundational concepts of human reproduction, pregnancy, and early infant care. You will explore the physiology of conception, fetal growth and development, and the systemic changes that occur throughout pregnancy. The unit covers key aspects of preconception and antenatal care, including the promotion of maternal health and monitoring of fetal wellbeing. You will be introduced to labour and intrapartum care, with a focus on postpartum physiological changes and care needs. You will also examine breast anatomy and lactational physiology to support your understanding of infant feeding practices. Through this unit, you will develop essential knowledge to support healthy pregnancy outcomes and postnatal wellbeing in mother-infant dyads.
