General Information

Overview

This capstone unit supports the advanced application of theoretical and clinical knowledge in pharmacology and the quality use of medicines, within the context of midwifery. By examining maternal, fetal, and neonatal physiology, you will analyse the use and impacts of over-the-counter, prescribed, and drugs of dependence across the childbearing continuum. Through comprehensive evaluation of current evidence and critical engagement with complex clinical scenarios, you will develop enhanced decision-making skills, professional autonomy, and ethical reasoning in medication management. The unit encourages reflective practice, research-informed care, and clinical leadership, preparing you to contribute meaningfully to health outcomes and practice innovation. By the conclusion of the unit, you will be equipped to provide safe, evidence-informed, family-centred midwifery care and transition with confidence to autonomous professional practice.
