Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE Feedback

Feedback

The lab workbook scores and feedback were not indicative of the students' expectations based on their interpretation of the marking rubric.

Recommendation

Investigate methods on how to provide more clarity to students of the expectations of the lab workbook task description and how to meet the assessment criteria requirements as detailed in the marking rubric.

Feedback from SUTE feedback and Unit Coordinator reflection

Feedback

The structure of the Moodle quiz assessment questions were "jumbled" with multiple choice, short and long response questions in random order.

Recommendation

Review the format of the Moodle quizzes and create categories within the quiz that align similar styles of questions together. This will support student time management during the test by allowing them to access their favoured style of questions in their order of preference.
