

MEDS13007 Musculoskeletal Sonography

Term 1 - 2024

Profile information current as at 19/05/2024 01:38 am

All details in this unit profile for MEDS13007 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit introduces you to the principal theory in musculoskeletal sonography. In this unit you will apply your knowledge of detailed relational anatomy and pathophysiology, and correlate this with new knowledge on sonographic appearance, scanning orientation and scanning skills relevant to the musculoskeletal system. You will demonstrate understanding of the clinical indication of musculoskeletal ultrasound, applying clinical reasoning in planning for the scanning protocol for each individual patient and implementing patient care and safety in performing musculoskeletal sonography. You will interpret static and dynamic musculoskeletal sonographic imaging and create a provisional diagnostic report as well as explaining differential diagnosis and alternative diagnostic studies based on the clinical information.

Details

Career Level: *Undergraduate*

Unit Level: *Level 3*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Pre-requisites: MEDS12001 Physics of Ultrasound AND MEDS12004 Sonographic Skills Development 1. Co-requisites: MEDS20016 Medical Sonography Clinical Unit 3 OR MEDS20017 Medical Sonography Clinical Unit 4.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2024

- Brisbane
- Mackay
- Melbourne
- Sydney

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Reflective Practice Assignment**

Weighting: 40%

2. **Online Quiz(zes)**

Weighting: 60%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE Unit Report

Feedback

Students like the layout of the quiz with a variety of question types which keeps it interesting and engaging.

Recommendation

Consider maintaining the quiz layout.

Feedback from SUTE Unit Report

Feedback

Students found the ultrasound images with detailed labels provided in lecture very useful for learning normal sonographic anatomy of musculoskeletal structures.

Recommendation

Provide more labeled ultrasound images in lectures, reading materials and other resources.

Feedback from SUTE Unit Report, student communication and Unit Coordinator reflection

Feedback

Students wanted more hands-on scanning opportunities while learning the theory of musculoskeletal sonography.

Recommendation

The course structure has been updated via Update Course Proposal to move Musculoskeletal Sonography into Year 4 where students will have daily access to scanning opportunities at their clinical placement. This will provide opportunities to apply the theory in practice and increase understanding of complex structures and common pathology encountered.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Correlate relational anatomy of musculoskeletal structures with standard static and dynamic sonographic imaging.
2. Describe clinical indications relevant to sonographic musculoskeletal examinations, patient care and safety considerations, and alternative musculoskeletal diagnostic studies that can be performed.
3. Critically acquire sonographic imaging of musculoskeletal structures, including image optimisation, using a systematic protocol in a simulated environment.
4. Interpret static and dynamic musculoskeletal sonographic imaging of normal anatomy and imaging demonstrating variants, artefacts, pathology or injury to create a provisional diagnostic report.

The learning outcomes for this unit have been linked to ASAR Standards for the Accreditation of Sonographer Courses:
Foundation Units of Competence - 1, 2, 3, 4 & 5
Critical Practice Units of Competence - 9

Schedule

Week 1 - 04 Mar 2024

Module/Topic	Chapter	Events and Submissions/Topic
Introduction to musculoskeletal ultrasound	Jacobson JA. Fundamentals of musculoskeletal ultrasound e-book 3rd Ed: Elsevier Health Sciences; 2017. Chap 1, pp1-15 Additional content will be provided via lectures and eReading list.	

Week 2 - 11 Mar 2024

Module/Topic	Chapter	Events and Submissions/Topic
Shoulder	Jacobson (3rd Ed): Chap 3, pp55-125. Additional content will be provided via lectures and eReading list.	

Week 3 - 18 Mar 2024

Module/Topic	Chapter	Events and Submissions/Topic
Shoulder	Jacobson (3rd Ed): Chap 3, pp55-125. Additional content will be provided via lectures and eReading list.	

Week 4 - 25 Mar 2024

Module/Topic	Chapter	Events and Submissions/Topic
Elbow	Jacobson (3rd Ed): Chap 4, pp127-158. Additional content will be provided via lectures and eReading list.	

Week 5 - 01 Apr 2024

Module/Topic	Chapter	Events and Submissions/Topic
Wrist and hand	Jacobson (3rd Ed): Chap 5 , pp168-222 Additional content will be provided via lectures and eReading list.	Be aware of the time changing as daylight saving ends on 7 April 2024

Vacation Week - 08 Apr 2024

Module/Topic	Chapter	Events and Submissions/Topic
Break Week		

Week 6 - 15 Apr 2024

Module/Topic	Chapter	Events and Submissions/Topic
Ankle and Foot	Jacobson (3rd Ed): Chap 8 , pp328-350, 352-386, 387- 401. Additional content will be provided via lectures and eReading list.	ONLINE QUIZZES (1) Due: Week 6 Friday (19 April 2024) 1:00 pm AEST

Week 7 - 22 Apr 2024

Module/Topic	Chapter	Events and Submissions/Topic
Knee and Calf	Jacobson (3rd Ed): Chap 7, pp284-327; Chap 8, pp350-351, 386-387. Additional content will be provided via lectures and eReading list.	

Week 8 - 29 Apr 2024

Module/Topic	Chapter	Events and Submissions/Topic
Hip and Thigh	Jacobson (3rd Ed): Chap 6, pp223-237, 239 -247, 249 -276. Additional content will be provided via lectures and eReading list.	

Week 9 - 06 May 2024

Module/Topic	Chapter	Events and Submissions/Topic
Abdominal Wall	Jacobson (3rd Ed): Chap 6, pp237-239, 276-280 Additional content will be provided via lectures and eReading list.	REFLECTIVE PRACTICE ASSIGNMENT Due: Week 9 Monday (6 May 2024) 4:00 pm AEST

Week 10 - 13 May 2024

Module/Topic	Chapter	Events and Submissions/Topic
Peripheral Nerve Entrapment	Jacobson (3rd Ed): Chap 4, pp158-166; Chap 5, pp203-210; Chap 6, pp271-273; Chap 7, pp320-321; Chap 8, pp398-401 Additional content will be provided via lectures and eReading list.	

Week 11 - 20 May 2024

Module/Topic	Chapter	Events and Submissions/Topic
Small Joints Diseases	Jacobson (3rd Ed): Chap 4, pp141-149; Chap 5, pp189-195; Chap 7, pp 300-309 & 313; Chap 8, pp352-363. Additional content will be provided via lectures and eReading list.	

Week 12 - 27 May 2024

Module/Topic	Chapter	Events and Submissions/Topic
Pathology of Musculoskeletal System	Jacobson (3rd Ed): Chap 2 , pp16-53 . Additional content will be provided via lectures and eReading list.	

Review/Exam Week - 03 Jun 2024

Module/Topic	Chapter	Events and Submissions/Topic
		ONLINE QUIZZES (2) Due: Week 13 Wednesday (5 June 2024) 1:00 pm AEST

Exam Week - 10 Jun 2024

Module/Topic	Chapter	Events and Submissions/Topic

Term Specific Information

Your unit coordinator for this unit is Elaine Wang. Elaine works for CQUniversity on Mondays, Tuesdays and Wednesdays. Elaine is based at Sydney campus and can be reached via email at e.wang@cqu.edu.au.

This unit covers the sonographic assessment of musculoskeletal structures. To undertake sonographic musculoskeletal assessments, it is important to have a deep understanding of the relative anatomy of the structures to be demonstrated. An understanding of the relational anatomy of musculoskeletal structures is assumed in this unit. To allow you to refresh your anatomical knowledge (covered in year 1 of the Medical Sonography course), a formative quiz is available for you to complete. You will need to ensure you complete this (multiple attempts are allowed) prior to gaining access to subsequent resources in this unit.

All lectures are pre-recorded and available on the MEDS13007 Moodle site, along with the associated lecture notes and reading material found in the eReading list. Other resources you will find on the Moodle site include advice from previous students, weekly learning objectives and review questions, frequently asked questions and image interpretation practice exercises.

This unit is being offered in 'teach-out' mode. As there will be limited student numbers, interactive discussions will be organised with the unit coordinator once the term commences.

Assessment Tasks

1 REFLECTIVE PRACTICE ASSIGNMENT

Assessment Type

Reflective Practice Assignment

Task Description

This task requires you to:

- Sonographically **scan and acquire specific static sonographic images of two specific musculoskeletal structures** and their anatomical surrounds from patient in your clinical placement during the enrolment of this unit (total of two labelled sonographic images to be submitted).
- Review the technique you used and the quality of the subsequent images and provide a **written reflection and critique of your sonographic technique and subsequent images** and consider what actions you could take in the future to allow improvement (1000 words).

The **two musculoskeletal structures** to be sonographically imaged are:

- Ulnar nerve (at wrist or elbow) – Short axis image
- Ankle tendons (medial or lateral) – Short axis image

For each structure imaged you are required to:

1. Practically acquire sonographic images of musculoskeletal structures as listed above.

Images submitted must include:

- Location (clinical placement) and date of image acquisition to be recorded on static images.
- Appropriate annotation of stored static sonographic images (axis of imaging, structure of interest demonstrated).

2. Reflect and review your practical technique used and subsequent sonographic images acquired.

You will need to complete a written document which includes:

- Static sonographic images which must have pertinent structures labelled (some labels can be annotated not at time of imaging).
- An outline of how the images were acquired – including an outline of the patient positioning of body and structure of interest, sonographic landmarks used to locate the structure of interest, and transducer placement.
- A critique of the static sonographic image acquired.
- If and how the sonographic imaging and subsequent stored image could have been improved to allow enhanced demonstration of the structures of interest in the correct axis and a justification. This can include what preparation you undertook prior to practically sonographically scanning the structure of interest.
- What you would incorporate into your technique to sonographically assess this structure or similar structures in the plane demonstrated in the future.
- Include a reflection on what general musculoskeletal sonographic principles you would use to apply to other musculoskeletal regions of the body.

An exemplar of this task is available on the unit Moodle site for you to use as a guide.

Assessment Due Date

Week 9 Monday (6 May 2024) 4:00 pm AEST

Return Date to Students

Week 11 Tuesday (21 May 2024)

Weighting

40%

Minimum mark or grade

50%

Assessment Criteria

The detailed assessment marking criteria can be accessed from the unit Moodle site.

Overall, you will be assessed on:

- All sonographic images and anatomical diagrams are labelled accurately.
- Relevant information provided reflecting good understanding of the content.
- Reflection identifies areas for improvement if required and allows for future practice to be enhanced.
- In-text citation of sources used to verify information with appropriate reference list at the end.
- Adherence to the word limit of 1000 words for **each case** to allow adequate reflection to be discussed. Excess

words will not be assessed.

Please Note:

- A signed **declaration form** (available on unit Moodle) must be submitted together with this assessment.
- Images submitted in this assessment must be originally exported from PACS or the ultrasound machine. Modifying images or changing information on images will be treated as **falsifying** or **fabricating** data.
- **Large Language Models (LLMs)**, a type of artificial intelligence (AI) such as Chat GPT do not necessarily provide accurate, current or correctly referenced information and are not considered reliable to use for academic work. Any use of LLM/AI in your assignments must be acknowledged using the Guidelines for Referencing Large Language Models or Artificial Intelligence.

Learning Outcomes Assessed

- Correlate relational anatomy of musculoskeletal structures with standard static and dynamic sonographic imaging.
- Critically acquire sonographic imaging of musculoskeletal structures, including image optimisation, using a systematic protocol in a simulated environment.
- Interpret static and dynamic musculoskeletal sonographic imaging of normal anatomy and imaging demonstrating variants, artefacts, pathology or injury to create a provisional diagnostic report.

2 ONLINE QUIZZES

Assessment Type

Online Quiz(zes)

Task Description

You need to complete two online quizzes which assess you on material covered in lectures, prescribed readings, tutorials and any additional resources supplied during the term.

- Quiz 1 weighting is **21%** of unit total and covers content from week 1 to week 5.
- Quiz 2 weighting is **39%** of unit total and covers content in the entire unit from week 1 to week 12.

The quizzes involve a variety question types, which may include short and long answer questions which require typed answers, drag and drop questions and combined questions.

The quiz **cannot be paused once started, nor reattempted once finished.**

These online quizzes must be completed by you alone, **without assistance or collusion with others.** You must ensure you are abiding by the CQU Student Academic Integrity Policy and Procedure. It is your responsibility to ensure that you are aware of and familiar with this policy and procedure. Any evidence of breaches of academic integrity (particularly collusion or academic misconduct) will be dealt with via this policy and procedure.

Please be aware:

- The quizzes are open book but time limited so familiarity with the content is required.
- Resources used in answers other than material provided by the unit coordinator need to be referenced.
- If you experience any technical difficulties during the test, please ring TaSAC and notify your Unit Coordinator as soon as physically possible (same day) with details of the technical issue.

2

Frequency of Quizzes

Other

Assessment Due Date

Quiz 1: Due: 19 April 2024, 13:00 AEST (Week 6, Friday); Available: between 17th April 1pm and 19th April 1pm; Quiz 2: Due: 5 June 2024, 13:00 AEST (Week 13, Wednesday); Available: between 3rd June 1pm and 5th June 1pm.

Return Date to Students

Quiz 1: Return from 3 May 2024 (Week 8, Friday), after all students have completed. Quiz 2: Return from 19 June 2024, after all students have completed.

Weighting

60%

Minimum mark or grade

50%

Assessment Criteria

The quizzes involve a variety of question types including the following ones.

- For drag and drop questions, you will be required to drag the most appropriate answer from a selection of possible answers and drop into the correct area.
- For combined questions, you will be asked either to decide whether the given statement is correct, or to fill in the words as required.

Exemplars can be accessed from the unit Moodle site.

Typed response answers will be assessed according to:

- Use of appropriate medical and sonographic terminology and descriptors and directional terms.
- Correct spelling of the terms.
- Relevance of response to the question asked.
- Irrelevant or incorrect information excluded.
- Adequate detail provided in the answer.

Referencing Style

Submission

Online

Submission Instructions

The online test can be accessed via the MEDS13007 Moodle site, under the assessment tab.

Learning Outcomes Assessed

- Correlate relational anatomy of musculoskeletal structures with standard static and dynamic sonographic imaging.
- Describe clinical indications relevant to sonographic musculoskeletal examinations, patient care and safety considerations, and alternative musculoskeletal diagnostic studies that can be performed.
- Interpret static and dynamic musculoskeletal sonographic imaging of normal anatomy and imaging demonstrating variants, artefacts, pathology or injury to create a provisional diagnostic report.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
