MEDS14002 *Medical Science Research 2*

Term 2 - 2027

Profile information current as at 18/09/2026 01:06 pm

All details in this unit profile for MEDS14002 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

Medical Science Research 2 will provide you with further training in research as you continue projects begun in Medical Science Research 1. This unit requires you to independently report on the investigation of the research question proposed. The final journal paper will typically contain the data analyses, results, and discussion in addition to a cogent literature review and hypotheses. It is anticipated that some journal papers may be suitable for eventual publication in an appropriate journal with the academic involved named as co-author. In all stages of the project you must adhere to appropriate ethical and professional standards.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit coordinator reflection

Feedback

Students appreciated the one-on-one guidance provided by the unit coordinator in preparing their projects, analysis data, and writing.

Recommendation

Continue to provide support for students via email and Zoom as required.

Feedback from Unit coordinator reflection, student feedback

Feedback

Students found the application of statistical analyses in research challenging.

Recommendation

Investigate further resources to support application of statistical analysis methods in research. Encourage students to take on projects in their workplaces where available.
