

Profile information current as at 01/03/2025 09:37 am

All details in this unit profile for MEDS20007 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit will enable you to gain knowledge concerning the performance of paediatric ultrasound, including cardiac assessment. You will develop the advanced knowledge and skills required to interpret the clinical signs, symptoms and diagnostic test results associated with complex pathophysiological conditions in the paediatric patient. Comparison of imaging, prognosis and treatment options will be undertaken within an ethical framework of family-centered practice and patient safety. To evaluate existing and emerging technology, diagnostic parameters and radiological interventions in paediatric ultrasound you will undertake a review of the relevant literature in an area of your choice. Please note that you will be required to have clinical access to paediatric patients in order to undertake and review a number of clinical cases.

Details

Career Level: Postgraduate Unit Level: Level 9 Credit Points: 6 Student Contribution Band: 8 Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

There are no requisites for this unit.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the <u>Assessment Policy and</u> <u>Procedure (Higher Education Coursework)</u>.

Offerings For Term 1 - 2019

Online

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

Regional Campuses

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

Metropolitan Campuses Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

Portfolio
 Weighting: 50%
 Written Assessment
 Weighting: 50%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the <u>University's Grades and Results Policy</u> for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the CQUniversity Policy site.

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the <u>CQUniversity Policy site</u>.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from "Have your say" feedback

Feedback

Case studies were interesting and were enjoyed.

Recommendation

More case studies will be added (case of the week format with 10 clinical cases). Clinical quizzes will also be reintroduced

Feedback from "Have your say" feedback

Feedback

A Masters Publishing Template for the assignments could be given to help teach and guide and clarify the expected level to be obtained.

Recommendation

Examples of assessments from previous years will be included on Moodle. Explanation of the assessment items will be further elaborated.

Feedback from "Have your say" feedback

Feedback

Appreciation of lecturer and unit coordinator knowledge.

Recommendation

More invited lectures from prominent clinicians in the field will be included.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

- 1. Differentiate the clinical appearance, aetiology and outcomes of advanced ultrasound assessment of paediatric and congenital disease, including echocardiographic vews of the paediatric heart.
- 2. Evaluate the physiology, pathophysiology and pharmacological factors relevant to diagnostic and therapeutic procedures in the paediatric patient.
- 3. Evaluate and present information concerning existing and emerging technology, diagnostic parameters and radiological interventions in a chosen area of paediatric ultrasound based on a review of relevant literature.
- 4. Apply practical skills and critical thinking to advanced clinical assessment and reporting of the paediatric patient.

This masters unit does not lead to entry into the sonography profession. It is for advanced practice by qualified practitioners. As such it does not require external accreditation but we will be seeking approval for the course from the accrediting body, the ASAR.

Schedule

Week 1 - Welcome and basics - 11 M	lar 2019	
Module/Topic	Chapter	Events and Submissions/Topic
Welcome to paediatric sonography. Basics and general issues. Appointments, waiting area, examination. Special procedures and equipment. Choosing equipment, Doppler, occupational injuries, image recording, new applications, safety.	Lectures and notes on Moodle site	 Zoom Tutorial - Thursday 14/03/2019 7:00 pm AEST - one-hour duration (the Zoom tutorials will discuss the case from the previous week, current week's topics and any other topic or questions) Case 1 posted online on Monday 11/03/19 9:00 am AEST Quiz 1 opens on Friday 15/03/19 at 9:00 am and will be open till Friday 21/06/19 5:00 pm AEST. This formative quiz is for testing your own knowledge and is non-assessable.
Week 2 - Urinary Tract - 18 Mar 201	9	
Module/Topic	Chapter	Events and Submissions/Topic
The Urinary Tract: Embryology / Anomalies, Prenatal renal pelvis dilatation, UTI, Cystic kidneys, "Bright" kidney, Calculi / nephrocalcinosis, Hypertension, Trauma, Tumours.	Lectures and notes on Moodle site	Discuss the topic for your written assessment with the unit coordinator Case 2 posted online on Monday 18/03/19 9:00 am AEST Quiz 2 on Friday 22/03/19 at 9:00 am and will be open till Friday 21/06/19 5:00 pm AEST. This formative quiz is for testing your own knowledge and is non-assessable.
Week 3 - Hepatobiliary - 25 Mar 201	9	
Module/Topic	Chapter	Events and Submissions/Topic
The Liver: Liver embryology/anatomy, Neonatal liver, Cystic dilatation of biliary system, Diffuse abnormalities, Focal lesions, Gallbladder / bile ducts Spleen: Normal spleen, congenital variants, splenomegaly, small spleen, focal lesions, trauma.	Lectures and notes on Moodle site	 Zoom Tutorial - Thursday 28/03/2019 - 7:00 pm AEST - one-hour duration (the Zoom tutorials will discuss the case from the previous week, current week's topics and any other topic or questions) Case 3 posted online on Monday 25/03/19 9:00 am AEST Quiz 3 on Friday 29/03/19 at 9:00 am and will be open till Friday 21/06/19
cystic fibrosis, diffuse conditions, focal lesions.		5:00 pm AEST. This formative quiz is for testing your own knowledge and is non-assessable.
Week 4 - Abdomen and gut - 01 Apr	2019	

Module/Topic

Chapter

Events and Submissions/Topic

The Abdomen and Bowel including duodenum. Developmental abnormalities/embryology, body wall defects, GORD, HPS, stomach conditions, malrotation, duplication, intussusception, appendix, bowel wall thickening, anorectal anomalies, cystic masses. Mesentery, omentum and peritoneum.	Lectures and notes on Moodle site	Case 4 posted online on Monday 01/04/19 9:00 am AEST Quiz 4 on Friday 05/04/19 at 9:00 am and will be open till Friday 21/06/19 5:00 pm AEST. This formative quiz is for testing your own knowledge and is non-assessable.
Week 5 - Female Reproductive Syste	em - 08 Apr 2019	
Module/Topic	Chapter	Events and Submissions/Topic Zoom Tutorial - Thursday 11/04/2019
The Female Reproductive System: Embryology, normal appearances, congenital abnormalities, neonatal masses, ambiguous genitalia, ovarian cysts. Precocious puberty, isolated premature thelarche, adrenarchy, puberty delay, menstrual dysfunction Ovarian neoplasms.	Lectures and notes on Moodle site	 7:00 pm AEST - one-hour duration (the Zoom tutorials will discuss the case from the previous week, current week's topics and any other topic or questions) Case 5 posted online on Monday 08/04/19 9:00 am AEST Quiz 5 on Friday 12/04/19 at 9:00 am and will be open till Friday 21/06/19 5:00 pm AEST. This formative quiz is for testing your own knowledge and is non-assessable.
Vacation Week - 15 Apr 2019		
Module/Topic	Chapter	Events and Submissions/Topic
Enjoy the brief vacation week - but don't forget to keep working on your portfolio and written assessment. A time to catch up on revision.		
Week 6 - The Scrotum - 22 Apr 2019		
Module/Topic	Chapter	Events and Submissions/Topic
The Scrotum and Testes: Embryology. Congenital anomalies, cryptorchidism, hernias and hydroceles, varicocele. Painful scrotum: torsion, epididymo- orchitis, appendicular torsion. Microlithiasis Tumours Extratesticular masses Trauma	Lectures and notes on Moodle site	
Week 7 - The Spine - 29 Apr 2019		
Module/Topic	Chapter	Events and Submissions/Topic
The Neck and Spine: Thyroid gland: anatomy, embryology, congenital anomalies, diffuse enlargement, malignancy. Parathyroid glands. Neck masses: thyroglossal cyst, branchial cleft anomaly, cystic hygroma, torticolis, lymphadenopathy, thymus, parotid. Spine: anatomy/embryology, dysraphism, sacral pit, dorsal dermal sinus, diastematomyelia, lipoma, tight filum terminale, meningocele, caudal regression, trauma.	Lectures and notes on Moodle site	 Zoom Tutorial - Thursday 02/05/2019 - 7:00 pm AEST - one-hour duration (the Zoom tutorials will discuss the case from the previous week, current week's topics and any other topic or questions) Case 6 posted online on Monday 29/04/19 9:00 am AEST Quiz 6 on Friday 03/05/19 at 9:00 am and will be open till Friday 21/06/19 5:00 pm AEST. The quiz is for testing your own knowledge and is non- assessable.

Week 8 - The Brain - 06 May 2019		
Module/Topic	Chapter	Events and Submissions/Topic
The Brain: Measurements, normal anatomy/emryology, intracranial hemorrhage, periventricular leukomalacia, congenital cystic abnormalities, trauma, hydrocephalous, vascular abnormalities.	Lectures and notes on Moodle site	Case 7 posted online on Monday 06/05/19 9:00 am AEST Quiz 7 opens on Friday 10/05/19 at 9:00 am and will be open till Friday 21/06/19 5:00 pm AEST. This formative quiz is for testing your own knowledge and is non-assessable.
Week 9 - MSK - 13 May 2019		
Module/Topic	Chapter	Events and Submissions/Topic
The Musculoskeletal System: Developmental dysplasia of hip, Graf technique. Osteomyelitis. Transient synovitis	Lectures and notes on Moodle site	Zoom Tutorial - Thursday 16/05/2019 - 7:00 pm AEST - one-hour duration (the Zoom tutorials will discuss the case from the previous week, current week's topics and any other topic or questions) Case 8 posted online on Monday 13/05/19 9:00 am AEST
Tendon abnormalities Soft tissue masses.		Quiz 8 opens on Friday 17/05/19 at 9:00 am and will be open till Friday 21/06/19 5:00 pm AEST. This formative quiz is for testing your own knowledge and is non-assessable.
Week 10 - Interventional US - 20 Ma	ay 2019	
Module/Topic	Chapter	Events and Submissions/Topic
Paediatric interventional ultrasound: Anesthesia Venous access Biopsy: renal, liver, others Aspiration and drainage Sclerotherapy	Lectures and notes on Moodle site	Case 9 posted online on Monday 20/05/19 9:00 am AEST Quiz 9 opens on Friday 24/05/19 at 9:00 am and will be open till Friday 21/06/19 5:00 pm AEST. This formative quiz is for testing your own knowledge and is non-assessable.
Urological intervention		Portfolio Due: Week 10 Monday (20 May 2019) 10:00 am AEST
Week 11 - Echocardiography - 27 M	ay 2019	
Module/Topic	Chapter	Events and Submissions/Topic
Paediatric Echocardiography: Hypoplastic Left Heart Syndrome (HLHS), Pulmonary Atresia (PA), Tetralogy of Fallot (ToF), Total Anomalous Pulmonary Venous Return (TAPVR), Transposition of Great Arteries (ToA), Tricuspid Atresia (TA), Truncus Arteriosus/Common Arterial Trunk (CAT), Coarctation of Aorta (CoA).	Lectures and notes on Moodle site	 Zoom Tutorial - Thursday 30/05/2019 - 7:00 pm AEST - one-hour duration (the Zoom tutorials will discuss the case from the previous week, current week's topics and any other topic or questions) Case 10 posted online on Monday 27/05/19 9:00 am AEST Quiz 10 opens on Friday 31/05/19 at 9:00 am and will be open till Friday 21/06/19 5:00 pm AEST. This formative quiz is for testing your own knowledge and is non-assessable. Written Assessment Due: Week 11 Monday (27 May 2019) 10:00 am AEST
Week 12 - Echocardiography - 03 Ju	n 2019	
Module/Topic	Chapter	Events and Submissions/Topic

Paediatric Echocardiography: Anesthesia, Double Outlet Right Ventricle (DORV), Ebstein's Anomaly (EA), Single Ventricle and Hypoplastic Right Heart Syndrome (SV&HRHS), Interrupted Aortic Arch.	Lectures and notes on Moodle site	
Review/Exam Week - 10 Jun 2019		
Module/Topic	Chapter	Events and Submissions/Topic
Exam Week - 17 Jun 2019		
Module/Topic	Chapter	Events and Submissions/Topic

Term Specific Information

Access to the internet is required to undertake this unit, as unit materials, tutorials and updates will be provided via Moodle, email and Zoom tutorials. You may need a camera and microphone to participate in the Zoom online sessions. Weekly resources will include access to relevant websites, activities, and readings. To give yourself the best chance of success with this unit please ensure that you undertake all the readings and activities. There will be Zoom tutorials on specified Th8ursdays from week 1 onwards. These will be posted on the Moodle site with sufficient notice. A discussion on the previous week's case, the current week's content and any other question/problem will be undertaken. They are not compulsory to attend but are highly recommended. These will be recorded and available for later view. Throughout the unit, there will be 10 cases posted on the Moodle site - followed by a formative quiz about that case. You can attempt these quizzes anytime until Exam week Friday (21/06/19) 5:00 pm. These are for your own practice and interest. They are not compulsory and not an assessable part of the unit.

The staff teaching in this unit are:

Dr. Aamer Aziz is the unit coordinator for the MEDS20007 unit. He is located on the Mackay QLD campus. The best way to contact Aamer is by email at <u>a.aziz@cqu.edu.au</u>, Aamer's CQU telephone number is 07 4940 7478. Aamer's office hours are 9 to 5 Monday to Friday but he is often in labs, so please use email whenever possible or leave a message on the phone.

Ms Allison Holley: Allison Holley is an accredited medical sonographer with a Masters of Applied Science in Medical Ultrasound. She currently works for Queensland X-ray, Brisbane, as a paediatric specialist sonographer. Prior to this, she was the Sonographer in Charge at the Mater Hospital Complex in Brisbane which includes the Mater Children's Hospital. Allison was a founding member of the ASA Paediatric SIG group and is on the ASA editorial review committee for paediatrics. Allison has published 2 books and several articles on paediatric ultrasound. She is the author of the paediatric ultrasound textbook "Paediatric Ultrasound A Practical Guide" for which she was awarded an ASUM Award of Excellence in 2013. Allison has been a senior faculty member of the Australian Institute of Ultrasound and a sessional lecturer for QUT.

Mr Christopher Kramer: Chris Kramer BA, ACS, RDCS, FASE, is an advanced cardiac sonographer and program director for the School of Diagnostic Medical Sonography at Aurora St. Luke's Health Care in Milwaukee, Wisconsin, USA. He is active in the American Society of Echocardiography as a member of the Sonographer Counsel, Board member of the Joint Review Committee on Education in Diagnostic Medical Sonography and is a team member on the American Registry of Diagnostic Medical Sonography writing and mentoring group. Chris has been in the field of echocardiography for the past 12 years, with interests in sonography education, quality, and new technology.

Assessment Tasks

1 Portfolio

Assessment Type Portfolio

Task Description

As a general sonographer, especially if you work with children, paediatric imaging is a very important aspect of your practice. There are many aspects of imaging the children which are different from adult imaging. Children present with varied symptomatology than adults. The incidence and prevalence of diseases are also very different from the adult population. It is imperative that you consider the differences in paediatric imaging. This assessment item gives you required knowledge to appreciate various paediatric specific pathologies by collecting few representative case studies.

This assessment item is a collection of paediatric cases that you come across in your everyday practice. The aim of this assessment is for you to collect clinically interesting cases and to reflect upon the role of ultrasound in their management. It enables you to differentiate the clinical appearance, aetiology, and outcomes of advanced ultrasound assessment of paediatric and congenital disease in terms of physiology, pathophysiology and pharmacological factors relevant to diagnostic and therapeutic procedures. You can then apply practical skills and critical thinking to advanced clinical assessment and reporting of the paediatric patient. This assessment item will not only enhance your knowledge, communication, cognitive, technical and creative skills but will also help in strengthening your self-management, ethical and professional responsibilities.

The portfolio is a collection of 4 case reports. You are to choose 4 interesting cases from your routine ultrasound practice showing some pathology. If you do not have access to paediatric patients you can source the case and images from any other source as long as you acknowledge the source. Each case report should address the following:

- Brief history and presentation of the patient with the clinical question asked.
- Discussion of other imaging and non-imaging investigations completed at the time of writing this assessment and pre-test diagnosis (with the degree of confidence).
- Details of the ultrasound examination performed.
- Discussion of findings of ultrasound and post-test diagnosis and discussion on comparison with pre-test diagnosis.
- Discussion of further management of the patient.
- At least 5 references are to be cited for each case.

Each case report should be short and to the point and not more than 1500 words (excluding the reference list). Relevant images (completely anonymized) are to be included. These images should be your own. You can use images from other sources, even the internet, but they MUST be properly referenced.

There is no residential school for this unit. **Students must successfully pass each individual assessment item in order to pass the unit.** Minimum passing marks are 50%.

Assessment Due Date

Week 10 Monday (20 May 2019) 10:00 am AEST

Return Date to Students

Week 12 Monday (3 June 2019)

Collaborated marks and feedback will be provided to the students within 2 weeks.

Weighting

50%

Assessment Criteria

Each case report will be assessed by considering each of the following: (Detailed marking rubric is available on Moodle site).

- Have you presented the case history adequately enough to raise a clinical suspicion or narrow differential diagnosis? Can you differentiate the clinical appearance, aetiology, and outcomes of advanced ultrasound assessment of paediatric and congenital disease?
- Have you included enough relevant detail? Can you evaluate the physiology, pathophysiology and pharmacological factors relevant to diagnostic and therapeutic procedures in the paediatric patient?
- Have you demonstrated your rationale, including all working out?
- Does your rationale indicate that you understand the topic? Can you apply practical skills and critical thinking to advanced clinical assessment and reporting of the paediatric patient?
- Have you adequate support from references?
- Is your spelling, grammar and use of vocabulary exemplary?
- Have you kept to the word limit?
- Have you included images of a reasonable quality?

You need a minimum of 50% to pass this assessment.

Learning Outcomes Assessed

• Differentiate the clinical appearance, aetiology and outcomes of advanced ultrasound assessment of paediatric

and congenital disease, including echocardiographic vews of the paediatric heart.

- Evaluate the physiology, pathophysiology and pharmacological factors relevant to diagnostic and therapeutic procedures in the paediatric patient.
- Apply practical skills and critical thinking to advanced clinical assessment and reporting of the paediatric patient.

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Self-management
- Ethical and Professional Responsibility

2 Written Assessment

Assessment Type

Written Assessment

Task Description

Paediatric imaging is rapidly changing with advancement in technology and a better understanding of paediatric pathologies. As a sonographer, paediatric imaging is a significant part of your practice. Awareness of changing spectrum of imaging technologies and protocols is essential to provide a specialised service that is efficient, modern and keeps up with the current trends.

This assessment item requires you to write a detailed report on a clinically relevant topic with the aim to discuss the role of imaging, particularly the new technologies in ultrasound. It requires a detailed description of the clinical appearance, aetiology, and outcomes of advanced ultrasound assessment of paediatric or congenital disease, with evaluation of the physiological, pathophysiological and pharmacological factors relevant to diagnostic and therapeutic procedures. The emphasis is on evaluating existing and emerging technology, diagnostic parameters, and radiological interventions, especially paediatric ultrasound, based on a review of relevant literature. This assessment will not only enhance your knowledge, communication, cognitive, technical and creative skills but also improve your research capability and ethical and professional responsibilities.

You are to select one topic that interests you clinically, in consultation with the unit coordinator. A decision as to your topic must be concluded, with the unit coordinator agreement, by the end of week 2.

Discuss the topic under the following headings (you can add more headings as deemed necessary):

- Unstructured abstract (200 words)
- A well-stated aim of the assessment. You can use Problem/Patient/Population, Intervention/Indicator, Comparison, Outcome, and Time (PICOT) to construct the aims.
- An introduction that includes the typical presentation, aetiology, and epidemiology of the case, with pathophysiology.
- Discuss existing and emerging diagnostic technologies, parameters and radiological interventions in paediatric ultrasound in reference to the topic. Evaluate their role and discuss the advantages and disadvantages of these procedures.
- Conclude by giving your recommendations.
- You can use tables, figures and graphs to support your discussion.
- You can use ultrasound images that must be your own (completely and properly anonymized). If you do not have your own images you can use the images from any other source (imaging or online) but you MUST properly reference the source.
- You will perform an exhaustive literature search that supports your arguments.

The word limit is 3000 (it excludes the abstract, tables, figures, diagrams and reference list). Further information about the assessment is provided on the Moodle site and will be discussed in Zoom tutorial sessions.

Assessment Due Date

Week 11 Monday (27 May 2019) 10:00 am AEST

Return Date to Students

Review/Exam Week Monday (10 June 2019)

Feedback and aggregate score will be provided to the students within 2 weeks.

Weighting

50%

Minimum mark or grade 50%

Assessment Criteria

The assessment will be marked based on: (The detailed marking rubric is available on the moodle).

- Differentiate the clinical appearance, aetiology, and outcomes of advanced ultrasound assessment of paediatric and congenital disease, including echocardiographic views of the paediatric heart.
- Evaluate and present information concerning existing and emerging technologies, diagnostic parameters and radiological interventions in a chosen area of paediatric ultrasound based on an extensive review of relevant literature.
- Evaluate the physiology, pathophysiology and pharmacological factors relevant to diagnostic and therapeutic procedures in the paediatric patient.

You must ask yourself the following:

- Is the introduction to the case engaging to the audience with a clearly stated aim?
- Is the description of the case clear and concise whilst giving all the relevant background information?
- Have you critically reflected upon and evaluated the imaging and non-imaging investigations in this case?
- Does the analysis of the case demonstrate academic rigour, depth, and insight?
- Have you done an exhaustive literature search about the current/emerging technologies and new imaging methods in ultrasound available that can be used in the case to advantage?
- Is the conclusion concise and clear in its evaluation and summary of the significance of the communication pitfalls and in its vision for your performance development?
- Are the grammar and spellings up to the standard? Is the sentence structure and language used is scientific and easily understandable?

This assessment must be submitted with all identifying factors removed. Identifying factors include such things as patient name, date of birth and clinical site name for example.

You must achieve a mark of 50% to pass this assessment.

Further details are available on the Moodle page along with detailed marking criteria.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the **Student Academic Integrity Policy and Procedure**. This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the <u>Academic Learning Centre (ALC)</u> can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Seek Help If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
