## General Information

### Overview

In this unit, you will expand upon the fundamentals of audio recording and mixing to develop skills in the application of sound design techniques in the production of a podcast in response to a brief. You will conduct research in the area of podcast sound design and use these findings to inform the planning stage of your podcast project. Once you define the scope of your podcast project, you will pitch this to your peers. Your project planning will culminate in the creation of a short podcast that contains original sound design elements such as dialogue, music, sound effects and atmospheric layers.
