MUSC12419 Music Technology 2: Electronic Music Production

Term 2 - 2025

Profile information current as at 24/11/2024 01:25 pm

All details in this unit profile for MUSC12419 have been officially approved by CQUUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit, you will be introduced to the fundamental principles of electronic music production including synthesis, sampling, MIDI sequencing and signal processing and apply these to the composition of an original piece of electronic music. You will explore genre-specific music production and composition techniques in the analysis of a chosen genre of electronic music. You will use these findings to inform the planning stage of your original composition project. Once you define the scope of your composition project, you will pitch this to your peers. Your project planning will culminate in the creation of an original piece of electronic music that adheres to the conventions of your chosen genre.

Change the scope of the final assessment task

Recommendation

Consider broadening the scope of the final assessment task to encompass a diverse range of music styles. This modification aims to provide students with the opportunity to apply their acquired skills and knowledge across various musical genres, fostering a more comprehensive understanding of music technology's applicability and relevance.
