Term 2 - 2024

Profile information current as at 19/05/2024 06:07 am

All details in this unit profile for NURS20162 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit will provide advanced knowledge and skills in nursing assessment and care planning. You will learn how to apply a clinical reasoning process and an Aboriginal and Torres Strait Islander health assessment model in order to prioritise and perform holistic nursing care for individuals, families and groups. You will critically examine common risk screening tools and clinical pathways used in practice, to organise and perform safe and effective nursing care. You will evaluate early warning systems and health assessment instruments through evidence-based research and by analysing practice and policy documents. You will consider best practice implications for medication administration, wound care and contemporary nursing psychomotor skills. There are online workshops you will be required to attend. There is a compulsory on campus activity you will have to attend. You will also undertake 160 hours of work-integrated learning which you will undertake after week 12. This will allow you to demonstrate responsible nursing practice under the supervision of a Registered Nurse. Work-integrated learning may be delayed due to travel restrictions and local healthcare service policy.
