NURS20170 *Patient Deterioration in the Clinical Setting*
Term 2 - 2024

Profile information current as at 02/06/2024 06:47 pm

General Information

Overview

This unit examines clinical assessment and diagnostic reasoning to recognise and respond to a patient's deteriorating condition with appropriate and timely actions. This unit will enhance your knowledge of serious adverse events such as unexpected death and cardiac arrest which often follow observable deterioration in the patient's condition. You will develop knowledge and skills in the early identification of deterioration, the initiation of prompt and effective action to minimise serious consequences, improve outcomes and lessen the level of intervention required to stabilise patients. The unit will focus on the underlying pathology of the patient's deteriorating condition and the interpretation of clinical manifestations to implement safe and effective nursing care. This unit will develop your theoretical knowledge of reflection in professional practice of nursing care coordination of the deteriorating patient.

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.

Assessment Overview

1. **Practical Assessment**
Weighting: Pass/Fail
2. **Reflective Practice Assignment**
Weighting: Pass/Fail

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the University's Grades and Results Policy for more details of interim results and final grades.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Interpret and explain physiological and psychosocial clinical parameters indicating patient deterioration.
2. Communicate effectively with interdisciplinary health teams, the patient and family to accurately transfer and escalate critical information.
3. Initiate and evaluate nursing interventions based on clinical assessment and diagnostic results to optimise patient outcomes.
4. Analyse a person-centred care approach to the deteriorating patient through critical self-reflection of professional practice.
