General Information

Overview

This unit is design to ensure you have the theoretical knowledge to work effectively as a community nutritionist /dietitian. You will begin by reflecting on your own culture and beliefs and how they may influence your future practice. You will then look at recognised frameworks and explicitly learn how to work responsively and effectively as a team member, exploring the roles and responsibilities of different members, including First Nation's partners, within an inter-professional team. Next, you will explore digital communication platforms and how to communicate effectively with people from culturally and geographically diverse backgrounds. Finally, you will apply the main models of behaviour change theory to plan, deliver and evaluate communication and culturally safe education programs aimed at improving the dietary intake of groups and communities.
