An historical overview of the profession will be presented so that you can contrast the changes and plot the evolution of occupational therapy practice from the profession's foundations to the present day. The practical application of occupational theory as it drives contemporary occupational therapy practice will be introduced via one key occupational therapy practice model. You will be introduced to the regulatory and professional bodies guiding ethical occupational therapy practice locally and internationally. Skill development will focus on the acquisition of qualitative and quantitative information gathering techniques including interviewing and the application of standardised and non-standardised assessments.
