OCCT12003 *Occupational Performance across the Lifespan 1*

Term 1 - 2027

Profile information current as at 21/09/2026 01:58 am

All details in this unit profile for OCCT12003 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit you will be introduced to professional reasoning, evidence based and culturally responsive practice for occupational therapy in the paediatric context from birth to middle childhood (0-12years). You will learn to administer occupational therapy evaluations, create measurable goals and facilitate interventions for children supported by evidence based frames of reference and occupational therapy practice models. You will explore key elements of realistic occupational therapy service delivery, using case studies of children with a range of impairments and occupational profiles. You will take part in interprofessional case discussions that simulate collaboration in a paediatric allied health team. Specific paediatric skills and knowledge will be enhanced through work integrated learning within the term, during which you will gain practical experience working with children.
