General Information

Overview

In this unit, you will study current approaches for the prevention, treatment and management of dental diseases such as dental caries (including root caries), periodontal diseases and non carious tooth structure loss. By recording and considering the patient's medical, dental and social history you will be able to diagnose dental diseases and develop an appropriate treatment plan. You will use your clinical judgment skills with a wide range of patients, including children and adults, medically compromised patients, people with special needs and the elderly.
