General Information

Overview

In this unit, you will study current approaches for the prevention, treatment and management of dental diseases such as dental caries (including root caries), periodontal diseases and non carious tooth structure loss. By recording and considering the patient's medical, dental and social history you will be able to diagnose dental diseases and develop an appropriate treatment plan. You will use your clinical judgment skills with a wide range of patients, including children and adults, medically compromised patients, people with special needs and the elderly.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE and In-class feedback

Feedback

Students felt overwhelmed by the volume of readings and suggested a clearer weekly breakdown with prioritised content

Recommendation

It is recommended to review the volume of weekly content.

Feedback from SUTE

Feedback

The informal group assessment 'Question and Answer' session was a positive and engaging experience

Recommendation

It is recommended to continue using the current format of the 'Question and Answer' session to support group assessment learning.
