General Information

Overview

In this unit you will gain theoretical knowledge in periodontal and dental hygiene diagnosis, treatment planning and treatment procedures. You will translate and integrate knowledge and skills learnt throughout the Bachelor of Oral Health course through work-integrated learning clinical practice. You must comply with clinical policies and procedures while undertaking clinical practice. You will improve your clinical reasoning skills in a supportive environment aimed to increase your confidence through reflective and self-directed learning. On successful completion of this unit, you will be able to demonstrate clinical judgment and practical skills in oral examination and diagnosis of dental conditions in adults of all ages. You will also be able to demonstrate safety and competence in patient care over a range of periodontal and dental hygiene clinical procedures, including referral of patients for complex care outside your scope of practice. You will be able to apply the principles of radiation biology and protection when producing diagnostic intra-oral and extra-oral radiographic images in the clinic. You will be able to communicate information regarding oral health in oral and written forms utilising appropriate interpersonal and team communication skills, professional attitudes and ethical behaviours. You will be required to attend a two-week compulsory intensive program prior to the commencement of Term 1.
