General Information

Overview

Focusing on global public health concerns and current priorities will ensure you are equipped with the most current knowledge and skills needed to address the ever-evolving health challenges worldwide. The COVID-19 pandemic highlighted the interconnectedness of global health and the necessity for a coordinated international response. The ongoing issues of health inequities and the impact of globalisation on health systems are critical areas that require your attention. This unit will emphasise current public health priorities to enable you to develop innovative solutions, implement effective policies, and contribute to building resilient health systems. Additionally, addressing contemporary issues aligns with global health agendas, including the Sustainable Development Goals (SDGs), fostering a comprehensive understanding of the complex factors influencing health outcomes on a global scale. By engaging with these priorities, you will be better prepared to tackle contemporary health challenges and respond effectively to emerging and future crises, ensuring that you can make a significant impact in the global health system.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE Unit Comments Report

Feedback

Assessment 2 design and marking criteria needed to be more specific to assist learning and performance.

Recommendation

Assessment 2 will be redesigned to support the development of students' presentation skills. Each student will deliver a three-minute presentation outlining their proposed project ideas during the class with their peers. The assessment criteria will be further refined to align with the revised task.

Feedback from SUTE Unit Comments Report

Feedback

At the time of completing this unit evaluation, assessment results were not live, so unable to give proper response for 'useful feedback on assessments'.

Recommendation

The sequence of assessments will be adjusted to ensure students receive timely feedback on their proposed project ideas during in-class presentations with their peers. This change is intended to support students in refining their project proposals, which represent a significant component of the unit.

Feedback from SUTE Unit Comments Report

Feedback

The unit excels through its interactive approach and use of practical examples to enhance conceptual understanding.

Recommendation

The teaching strategy will continue to emphasize an interactive engagement approach.
