General Information

Overview

Public Health Practice in the Cross-Cultural Community develops advanced knowledge and applied skills for effective public health engagement in culturally diverse contexts. The unit focuses on critically examining how social, cultural, structural, and systemic factors interact to influence health behaviours, health outcomes, and access to services across populations. You will develop the capacity to analyse complex public health challenges, apply evidence-informed perspectives, and engage with ethical and culturally responsive approaches to public health decision-making. Emphasis is placed on translating theory into practice through the evaluation, design, and improvement of public health initiatives relevant to real-world cross-cultural settings. The unit will prepare you to work effectively with communities, organisations, and stakeholders, demonstrating advanced judgement, cultural responsiveness, and professional accountability consistent with contemporary public health practice.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student feedback and self-reflection

Feedback

To adjust the due date of Assessment 1 from Week 8 to Week 6 to provide students with increased spacing between the two assessments, supporting better workload management and reduced pressure.

Recommendation

The due date for Assessment 1 should be moved from Week 8 to Week 6.
