General Information

Overview

This unit is designed to equip primary healthcare paramedics with the essential knowledge and skills required for effective medication prescribing across diverse clinical settings. It covers the foundational aspects of pharmacology, including pharmacokinetics, pharmacodynamics, drug interactions, and rational medication use. Additionally, it focuses on interpreting and applying prescribing guidelines, navigating legal, cultural and ethical considerations, and ensuring compliance with professional standards. You will also learn to critically assess patient information, make evidence-based prescribing decisions, and cultivate effective communication and collaboration skills vital for interprofessional practice. This comprehensive unit provides a well-rounded foundation for primary healthcare paramedics seeking to excel in medication prescribing, ultimately improving patient care and outcomes.
